APPENDIX 14 – HOW TO ENTER TEMPORARY IMPORT EXEMPTION FOR EQUIPMENT SUBMITTALS USING NHTSA’S MANUFACTURER PORTAL	110
APPENDIX 15 - FMVSS APPLICABILITY TO VEHICLE TYPE AND EQUIPMENT ITEMS	119
APPENDIX 16 – SAMPLE TIRE REGISTRATION FORM – INDEPENDENT DISTRIBUTORS AND DEALERS	123
DOCUMENT REVISIONS	124

Requirements for Manufacturers of Motor Vehicles and Motor Vehicle Equipment Items

Disclaimer – This document is a simplified description of the requirements for manufacturers of motor vehicles and motor vehicle equipment and does not supersede any requirements contained in the statutes and regulations administered by The National Highway Traffic Safety Administration. Please refer to the statutes and regulations cited herein for a more detailed description of such requirements.

Chapter 1. Background

Federal Statutes and Regulations

The National Highway Traffic Safety Administration (NHTSA) is the U.S. government agency responsible for implementing and enforcing the National Traffic and Motor Vehicle Safety Act of 1966, as amended, 49 U.S.C. Chapter 301 (the Vehicle Safety Act), and certain other laws relating to motor vehicle safety. Under that authority, NHTSA issues and enforces Federal motor vehicle safety standards (FMVSS) that apply to motor vehicles and to certain items of motor vehicle equipment. Implementing regulations are found in Title 49 of the Code of Federal Regulations (CFR), Parts 500-599.¹ Most CFR citations in this document are to specific sections of the regulations. For example, FMVSS No. 101 Controls and Displays can be found at 49 CFR 571.101.

How and Why Were the Federal Motor Vehicle Safety Standards Developed?

The Vehicle Safety Act was enacted to reduce traffic crashes and deaths and injuries resulting from traffic crashes. Under that authority, NHTSA issues and enforces FMVSS that apply to motor vehicles and certain items of motor vehicle equipment. The Vehicle Safety Act requires that each FMVSS be practicable, meet the need for motor vehicle safety, and be stated in objective terms.² On February 3, 1967, NHTSA published a final rule establishing the first FMVSS.³

Motor Vehicle and Motor Vehicle Equipment Certification

The Vehicle Safety Act requires that motor vehicles and regulated items of motor vehicle equipment manufactured for sale in the United States be certified to comply with all applicable FMVSS.⁴ Type approval is not required for motor vehicles and motor vehicle equipment sold in the United States. NHTSA does not issue type approval certifications and does not certify any motor vehicles or motor vehicle equipment as complying with applicable FMVSS. Instead, in accordance with 49 U.S.C. 30115, a “self-certification” process is in place, which requires the manufacturer to certify the vehicle or equipment item as complying with the applicable FMVSS. The Vehicle Safety Act requires the exercise of “reasonable care” in issuing a certification of compliance with safety standards.⁵

³ See 32 FR 2408

⁴ See 49 U.S.C. 30115

⁵ Ibid.

Penalties for Violations of the Vehicle Safety Act and Implementing Regulations

Manufacturers may be subject to substantial civil penalties for failure to meet the requirements of the statutes and regulations that NHTSA administers.⁶ Currently, those penalties can be as high as \$21,000 for each violation with a maximum civil penalty of \$105,000,000 for a related series of violations.⁷ For example, the failure of a manufacturer to furnish notification of noncompliance or defect to owners or to NHTSA may subject the fabricating manufacturer to substantial civil penalties.

Chapter 2. What does NHTSA Regulate?

Motor Vehicles

Motor vehicles are defined by statute as vehicles that are driven or drawn by mechanical power and manufactured primarily for use on public streets, roads, or highways.⁸ In regulating the manufacture of motor vehicles, NHTSA has established the type classifications identified and defined in Table 1.⁹

Table 1 – Motor Vehicle Type Classifications

Classification	Definition
Passenger car	A motor vehicle with motive power, except a low-speed vehicle, multipurpose passenger vehicle, motorcycle, or trailer, designed for carrying 10 persons or less.
Multipurpose passenger vehicle	A motor vehicle with motive power, except a low-speed vehicle or trailer, designed to carry 10 persons or less which is constructed either on a truck chassis or with special features for occasional off-road operation.
Truck	A motor vehicle with motive power, except a trailer, designed primarily for the transportation of property or special purpose equipment.
Bus	A motor vehicle with motive power, except a trailer, designed for carrying more than 10 persons.
Motorcycle	A motor vehicle with motive power having a seat or saddle for the use of the rider and designed to travel on not more than three wheels in contact with the ground.
Trailer	A motor vehicle with or without motive power, designed for carrying persons or property and for being drawn by another motor vehicle.
Low-speed vehicle	A motor vehicle, that is 4-wheeled, whose speed attainable in 1 mile (1.6 km) is more than 20 miles per hour (32 kilometers per hour) and not more than 25 miles per hour (40 kilometers per hour) on a paved level surface, and whose GVWR is less than 3,000 pounds (1,361 kilograms).
Pole Trailer	A motor vehicle without motive power designed to be drawn by another motor vehicle and attached to the towing vehicle by means of a reach or pole, or by being boomed or otherwise secured to the towing vehicle, for transporting long or irregularly shaped loads such as poles, pipes, or structural members capable generally of sustaining themselves

All motor vehicles must be classified in the manner set forth in Table 1. For example, school buses are classified as buses, motor driven cycles are classified as motorcycles, and motor homes are classified as multipurpose passenger vehicles. Vehicles such as race cars, dirt bikes, or all-terrain vehicles that are not primarily manufactured for on-road use do not qualify as motor vehicles and are therefore not regulated by NHTSA. Instead, such vehicles may be regulated by the Consumer Product Safety Commission (CPSC).¹⁰

⁶ See 49 U.S.C. 30165

⁷ See 49 CFR Part 578

⁸ See 49 U.S.C. 30102

⁹ See 49 CFR § 571.3 Definitions

¹⁰ See www.cpsc.gov

Motor Vehicle Equipment

The Vehicle Safety Act defines motor vehicle equipment as:

- Any system, part, or component of a motor vehicle as originally manufactured.
- Any similar part or component manufactured or sold for replacement or improvement of a system, part, or component, or as an accessory or addition to a motor vehicle; or
- Any device or an article of apparel (except medicine or eyeglasses prescribed by a licensed practitioner) that is not a system, part, or component of a motor vehicle and is manufactured, sold, delivered, offered, or intended to be used only to safeguard motor vehicles and highway users against risk of accident, injury, or death.¹¹

The Vehicle Safety Act requires that regulated items of motor vehicle equipment manufactured for sale in the United States be certified to comply with all applicable FMVSS.¹² Motor vehicle equipment items that are not subject to the FMVSS do not require certification; however, such items may be found (by either NHTSA or the manufacturer) to have a safety-related defect, and if so, the manufacturer will have an obligation to furnish owners of the equipment with notification of, and a remedy for, the defect, usually at no charge to the consumer. Motor vehicle equipment items that are subject to the FMVSS are identified in Table 2.

Table 2 – Motor Vehicle Equipment Items Subject to the FMVSS

Motor Vehicle Equipment Description	See FMVSS Number(s)
Tires	109/110/117/119/120/129/139
Rims	110/120
Brake Hoses	106
Brake Fluid	116
Seat Belt Assemblies	209
Lamps, Reflective Devices, and Associated Equipment	108
Glazing (Automotive Glass and Plastics)	205
Motorcycle Helmets	218
Child Restraint Systems (Child Safety Seats)	213
Platform Lift Systems for The Mobility Impaired	404
Rear Impact Guards for Trailers	223
Triangular Reflective Warning Devices	125
Compressed Natural Gas Containers	304

¹² See 49 U.S.C. 30115

Chapter 3. Procedural Requirements for Fabricating Manufacturers

Introduction

Before offering a motor vehicle or motor vehicle equipment item for sale in the United States, the fabricating manufacturer must: 1) designate a permanent resident of the United States as its agent for service of process if the fabricating manufacturer is not located in the United States (49 CFR Part 551, Subpart D *Service of Process on Foreign Manufacturers and Importers*) and 2) submit to NHTSA identifying information on itself and on the products it manufactures to the FMVSS, not later than 30 days after the manufacturing process begins (49 CFR Part 566 *Manufacturer Identification*).¹³ Forms Part 565 & Part 566, as well as Equipment and Tire forms must be submitted to the NHTSA Manufacturer Portal. Information about the Portal can be found in Appendix 7.

Part 551 - Designate a Permanent Resident of the United States as its Agent for Service of Process

All foreign manufacturers, assemblers, and importers of motor vehicles or motor vehicle equipment must comply with this regulation before offering a motor vehicle or item of motor vehicle equipment for importation into the United States. The purpose of this regulation is to ensure that NHTSA is able to serve the manufacturer's agent with administrative or judicial notice or process. A detailed explanation of this regulation may be found in 49 CFR Part 551, Subpart D.

To expedite NHTSA's processing of submissions received under Part 551, Subpart D, foreign manufacturers may submit designation information online at: <http://vpic.nhtsa.dot.gov/MfrPortal/>. After a manufacturer submits designation information online, NHTSA's database will email a confirmation of the form.

The manufacturer can email a copy of the print-out with ink signatures (no electronic signatures) to the following address within 2 months: NHTSAAgentDesignations@dot.gov

If you are unable to email your completed print-out, please mail (preferably via express mail services) the hardcopy with ink signatures to the following address within 2 months:

US Department of Transportation NHTSA Correspondence Unit
1200 New Jersey Avenue, SE, Room W41-306 Washington, DC 20590

Please note that there is a significant delay in processing submissions sent to DOT headquarters.

Please do not send duplicate copies of the completed print-out to the email address and DOT headquarters as this will delay processing of your submission.

Part 566 - Manufacturer Identification

Manufacturers of motor vehicles and of motor vehicle equipment to which a FMVSS applies (except tires), must submit to NHTSA identifying information and a description of the items they produce not later than 30 days after manufacturing begins.¹⁴ Not later than 30 days after any relevant business information changes, manufacturers must notify NHTSA to ensure that their records remain current, accurate, and complete.¹⁵

An individual business such as a corporation or limited liability company may want to operate multiple businesses without creating a new legal entity for each business. In the United States, these names are generally registered with the Office of the Secretary of State for the State in which the company is domiciled.

¹³ NHTSA maintains on its website a list of manufacturers that have made Part 566 submissions. See <http://vpic.nhtsa.dot.gov/mid/>

¹⁴ See 49 CFR Part 566

¹⁵ NHTSA obtains tire manufacturer identification information when the agency assigns a plant code to the tire manufacturer. See 49 CFR 574.5

Business laws may be different from State to State and even more diverse from country to country; however, it is important for manufacturers to furnish NHTSA with all versions of its company's legal business name, including trade names, assumed names, fictitious business names, and brand or label names that are associated with the business. Unregistered manufacturers' names on vehicle certification labels, importation documents, or vehicle ownership documents may cause confusion or delays when processing vehicles at the ports or during titling and registration of the vehicles for on-road use. Several examples of business names are shown in Table 3.

Table 3 – Examples of Assumed / Fictitious Business Names

Acme Company, Inc.	Trading As or T/A	Smith Productions
Jones Manufacturing	Doing business as or DBA or d/b/a	Acme Company, Inc.
Smith and Sons	A Division of	Acme Company, Inc.
Jones Manufacturing	A Subsidiary of	Acme Company, Inc.
Brown Quality Motors, Ltd.	Operating as or o/a	BQM Associates
China ABC Group Co. Ltd.	Doing business as or DBA or d/b/a	Qinghai Wu Industries

See Appendix 6 for instructions on how to search NHTSA's Manufacturers' Information database and Appendix 7 for instructions on how to submit 566 submittals to NHTSA Manufacturer Portal at: <http://vpic.nhtsa.dot.gov/MfrPortal/>.

Part 566 information submitted by manufacturers is searchable on the Manufacturer's Information Database web site is: <http://vpic.nhtsa.dot.gov/mid/>.

Chapter 4. Vehicle Identification Numbers

Vehicle Identification Number or VIN

Under regulations administered by NHTSA, a vehicle identification number or VIN is "a series of Arabic numbers and Roman letters that is assigned to a motor vehicle for identification purposes."¹⁶ Among other things, NHTSA's regulations at 49 CFR Part 565 require a motor vehicle manufacturer to assign to each motor vehicle manufactured for sale in the United States a 17-character VIN that uniquely identifies the vehicle. The VIN must be correctly formatted and include a check digit in Position 9 that is mathematically correct under a formula that is included in the regulation. VINS are required to have 17 characters that do not include the letters I, O, or Q. Beginning with the 1980 model year, the VINs of any two vehicles manufactured within a 60-year period must not be identical. All spaces provided for in the VIN must be occupied by a character specified in Part 565 and the type face used for each VIN must be in capitals and use sans-serif characters. This means that the characters will not have fine lines or "serifs" finishing off the main strokes of the letters. The VIN of each vehicle must appear clearly and indelibly upon either a part of the vehicle, other than the glazing, that is not designed to be removed except for repair or upon a separate plate or label that is permanently affixed to such a part.¹⁷

VIN Location on Vehicles

The VIN for passenger cars, multipurpose passenger vehicles, low-speed vehicles, and trucks of 10,000 lbs. or less gross vehicle weight rating (GVWR) must be located inside the passenger compartment and readable, without moving any part of the vehicle, through the vehicle glazing (windshield) from outside the vehicle adjacent to the left windshield pillar.¹⁸ This is commonly called the "public VIN." NHTSA regulations require that a motorcycle's VIN need only appear on the label certifying compliance with all applicable FMVSS that the manufacturer must affix to a permanent member of the motorcycle as close as practicable to the intersection of the steering post with the handle bars in such a location that it can be easily readable without moving any part of the vehicle except for the steering mechanism.¹⁹

¹⁶ See 49 CFR 565.12(r)

¹⁷ See 49 CFR 565.13(e)

¹⁸ See 49 CFR 565.13(f)

¹⁹ See 49 CFR 567.4(e)

The VIN for a trailer must appear on the label certifying the vehicle's compliance with all applicable FMVSS that the manufacturer must affix to a location on the forward half of the trailer's left side, such that it is easily readable from outside the trailer without moving any part of the vehicle.²⁰

VIN Content

On April 30, 2008, NHTSA issued amended VIN regulations.²¹ These amendments were necessary to make certain that the VIN system would remain viable for the next 30 years. All motor vehicles that are manufactured on or after April 30, 2009, are subject to the amended regulation.

Chart 1 identifies how a VIN is formatted, the general contents of a VIN, and specifications for the characters to be used in certain positions of the VIN.

Chart 1 – General VIN Format

1 st Section			2 nd Section					3 rd	4 th Section								
Identifies Manufacturer and Type of Vehicle			Identifies Vehicle Attributes (Now includes Vehicle Make)					Check Digit	MY	Plant	Number sequentially assigned in Positions 12-17 if a High-Vol. Manu. or in Positions 15-17 if a Low-Vol. Manu.						
1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16	17	
		"9" if low-vol. manu.									WMI if low-vol. manufacturer (<1,000 of a given type each year)						
							@@										
							if car, and MPV and truck ≤ 10,000 lbs.										
								###	###	###	###	###	if car, and MPV and truck ≤ 10,000 lbs.				
											###	###	###	###	For vehicle <u>not</u> a car, and MPV and truck ≤ 10,000 lbs.		
<p>@@ means that VIN Characters are: A,B,C,D,E,F,G,H,I,K,L,M,N,P,R,S,T,U,V,W,X,Y, or Z ### means that VIN Characters are: 0,1,2,3,4,5,6,7,8, or 9</p>																	

The VIN is comprised of four sections. Each section is described in detail below.

First Section of the VIN

The first section of a VIN consists of three characters. These first three characters of a VIN uniquely identify a motor vehicle manufacturer using the "World Manufacturer Identifier" or WMI code, if the manufacturer produces 1,000 or more vehicles of a given type each year (i.e., a "high-volume" manufacturer²²). A "low-volume" manufacturer that produces fewer than 1,000 vehicles of a given type each year uses the numeral "9" as the third character and Positions 12, 13, and 14 of the VIN for the remainder of the WMI. The placement of the WMI within a 17-character VIN is identified in Chart 2.

²⁰ See 49 CFR 567.4(d)

²¹ See 73 Federal Register 23367, Published April 30, 2008

²² See 49 CFR 565.12(e)

Chart2 - Placement of the World Manufacturer Identifier in the VIN

1 st Section			4 th Section								
Identifies Manufacturer and Type of Vehicle			MY	Plant	Identifies (among other things) the 2nd part of the WMI for low-volume manufacturers in Positions 12, 13, and 14						
1	2	3	4,5,6...	10	11	12	13	14	15	16	17
		"9" if low-vol. manu				WMI if low-vol. manufacturer (<1,000 of a given type each year)					

Obtaining a World Manufacturer Identifier

A manufacturer that intends to assemble motor vehicles in the United States must obtain a WMI from the SAE International (Previously known as the Society of Automotive Engineers). NHTSA has a contract with that organization to assign WMIs to manufacturers that assemble motor vehicles in the United States. Manufacturers must contact the SAE directly (and not NHTSA) to request the assignment of a WMI. They may do so by telephoning 724-772-8511 or by writing to: SAE International, 400 Commonwealth Avenue, Warrendale, PA 15096, Attention: WMI Coordinator.

Second Section of the VIN

The second section of the VIN, known as the "Vehicle Descriptor Section," consists of Positions 4 through 8. This second is used to identify "vehicle attributes" for each vehicle type as identified by 49 CFR 565.15, Table I, entitled "*Type of Vehicle and Information Decipherable*." There are two special rules for passenger cars, and for multi-purpose passenger vehicles (MPVs) and trucks with a gross vehicle weight rating (GVWR) of 10,000 lbs. or less. First, manufacturers of such vehicles must report all restraint devices and their locations in the vehicles. Second, Position 7 of the VIN of such a vehicle must be alphabetic. Therefore, for passenger cars, and MPVs and trucks with a GVWR of 10,000 lbs. or less, if Position 7 of the VIN is alphabetic, the model year identified in Position 10 of the VIN refers to a year in the range of 2010-2039. Position 7 of VINs assigned to other vehicle types (e.g., motorcycles, buses, trailers) may be either alphabetic or numeric.

Part 565 requires that manufacturers identify in the second section of the VIN, the vehicle attributes for each vehicle type as summarized in Chart 3.

Chart 3 - Vehicle Attributes for Each Vehicle Type that must be Identified in VIN Positions 4 through 8

Required Information for:	Passenger	Multipurpose	Truck*	Bus	Trailer	Motorcycle	Incomplete	Low Speed
Make	Yes	Yes	Yes	Yes	Yes	Yes	Yes	Yes
Line or Model	Yes	Yes	Yes	Yes		Yes	Yes	
Series	Yes	Yes	Yes	Yes			Yes	
Body Type	Yes	Yes		Yes				Yes
Engine Type	Yes	Yes	Yes	Yes		Yes	Yes	Yes
GVWR@		Yes	Yes					Yes
All Restraint Devices & Location*	Yes	Yes	Yes					Yes
Chassis			Yes					
Cab Type			Yes				Yes	
Brake System			Yes	Yes			Yes	Yes
Trailer Connection Type					Yes			
Trailer Body Type					Yes			
Length					Yes			
Axle Configuration					Yes			
Type of Motorcycle						Yes		
Net Brake Horsepower@@						Yes		

Footnotes to Chart 3:
 @The GVWR designations in "Table II – Gross Vehicle Weight Rating Classes" must be used. The use of these designations within the VIN itself is not required.
 @@Engine net brake horsepower when encoded in the VIN cannot differ by more than 10% from the actual net brake horsepower. In the case of a motorcycle with an actual net brake horsepower of 2 or less, the net brake horsepower must be not more than 2, and must be greater than 2 in the case of a motorcycle with an actual brake hp greater than 2. (The purpose of this exception is to preserve the distinction in the VIN between motorcycles and motor driven cycles.)
 *Trucks and Multipurpose Passenger Vehicles of GVWR<10,000 lbs. are required to have all restraint devices and locations available -- Trucks and MPVs of GVWR>10,000 lbs. are not required to have this information.

The terms used in Chart 3 are defined in 49 CFR 565.12. These definitions, and examples of the vehicle characteristics they cover, are identified in Chart 4.

Chart 4 – Definitions and Examples of Vehicle Attributes

Term	Definition	Examples
Type	means a class of vehicle distinguished by common traits including design and purpose	Passenger cars, Multipurpose Passenger Vehicles (MPVs), Trucks, Buses, Trailers, Incomplete Vehicles, Low Speed Vehicles (LSVs), and Motorcycles are separate types
Make	means a name that a manufacturer applies to a group of vehicles or engines	Chevrolet, Buick, Pontiac, Cadillac
Model	means the name that a manufacturer applies to a family of vehicles of the same type, make, line, series, and body type	Monte Carlo, Malibu, Lucerne, CTS
Line	means a name that a manufacturer applies to a family of vehicles within a make that have a degree of commonality in construction, such as body, chassis, or cab type	Super Sport, LT Classic, GXP, CX, CXL
Series	means a name that a manufacturer applies to a subdivision of a “line” denoting price, size or weight identification, and that is used by the manufacturer for marketing purposes	3500, 4500, 5500, 6500 Series
Body Type	means the general configuration or shape of a vehicle distinguished by such characteristics as the number of doors or windows, cargo carrying features and the roofline	4-door Sedan, 2-door, 2-door Fastback, 3-door Hatchback, 2-door Convertible, 5-door Liftback, 4-door Station Wagon
Engine Type	means a power source with defined characteristics. The specific manufacturer and make shall be represented if the engine powers a passenger car, and a MPV or truck with a GVWR ≤ 10,000 lbs.	Fuel utilized, number of cylinders, displacement, and net brake horsepower.

Trucks and other vehicle types have as many as nine reportable vehicle attributes and only five VIN positions in which to report these. This causes NHTSA to be frequently asked: “How do I fit all this information into the second section of the VIN?”

Part 565 gives manufacturers the flexibility to determine how they wish to structure or “encode” the contents of this section. One way a manufacturer may encode the information is to employ a “lookup table.” For example, the manufacturer’s five VIN characters “ABCDE” may be decoded using a lookup table to identify more than five vehicle attributes. It is important to remember that the manufacturer’s coding must be decipherable to NHTSA so that the agency may carry out its safety mission. The following examples for a passenger car may help clarify this.

Passenger Car Manufacturer’s Sample VIN for the Second Section of the VIN (Positions 4-8)

Position	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16	17
Example				R	P	1	A	3									

Note: Please remember VINs cannot contain the characters I, O or Q and that Position 7 must be alphabetic for passenger cars, and MPVs and trucks with a GVWR of 10,000 lbs. or less manufactured on or after April 30, 2009.

Sample Passenger Car Manufacturer's Lookup Table for the Second Section of the VIN (Positions 4-8)

Passenger Car Vehicle Attributes That Must Be Identified							
VIN 4-8 Code	Make	Line or Model	Series	Body Type	Engine Type	GVWR Class @	Restraint System @@
RP1A3	USA Car Co.	Super	LV	3 Dr. Coupe	2.4L 4 cyl. 180hp gas	A	A
RP1B3	USA Car Co.	Super	DV	4 Dr. Sedan	2.4L 4 cyl. 180hp Gas	B	B

Manufacturer's Notes to Lookup Table:
 @GVWR Class is from 49 CFR 565.15 "Table II - Gross Vehicle Weight Rating Classes"
 A= Not greater than 1360 kg. (3,000 lbs.)
 B=Greater than 1360 kg. to 1814 kg. (3,001-4,000 lbs.)
 @@Restraint System
 A= Front: Seat Belt, Air Bag, Side Air Bag, and Side Curtain Air Bag (Driver and Passenger) and Rear: Seat Belt and Side Curtain Air Bag.

Motorcycle VINs

Part 565 requires only five vehicle attributes of a motorcycle to be reported in the second section of a VIN. Because there are five positions available in the second section, a manufacturer may use each position for one of the five attributes. A motorcycle example will show how the second section of the VIN may be encoded.

Motorcycle Manufacturer's Sample VIN for the Second Section of the VIN (Positions 4-8)

Position	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16	17
Example				U	2	A	D	G									

Sample Motorcycle Manufacturer's Lookup Table for the Second Section of the VIN (Positions 4-8)

VIN Position	Vehicle Attribute	Coding
4	Make	U=USA Motorcycle Co.
5	Line or Model	2=Winner
6	Type of Motorcycle	A= Scooter B=Sport Bike C=Cruiser
7	Engine Type	D=V-2, 200cc, gas E= V-4, 400cc, gas F=V-8, 1000cc, gas
8	Net Brake HP	G=V-2 - 15hp H=V-4 - 36hp J=V-8 - 75hp

Trailer VINs

The vehicle attributes “length” and “axle configuration” are applicable only to trailers. Although the term “length” is not defined in Part 565, the agency has interpreted it to mean the length of a trailer as measured from one extremity to the other. For a trailer, this would include the equipment that is part of the vehicle and by which it is towed (i.e., the tongue or equivalent connector to the towing vehicle). Axle configuration means the number of axles, e.g., 1-axle, 2-axle, 3-axle, etc. A trailer example will show how VIN Positions 4 through 8 of the second section may be encoded.

Trailer Manufacturer’s Sample VIN for the Second Section of the VIN (Positions 4-8)

Position	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16	17
Example				U	1	M	6	1									

Sample Trailer Manufacturer’s Lookup Table for the Second Section of the VIN (Positions 4-8)

VIN Position	Vehicle Attribute	Coding
4	Trailer Make	U=USA Trailer Co.
5	Trailer to Towing Vehicle Connection Type	1=Ball Type Pull 2=Pinle Hitch 3=Gooseneck 4=Straight Semi 5=Fifth Wheel 6=Kingpin 7=Bumper Pull 8=Others
6	Trailer Body Type	A=Flatbed B=Tank C=Utility D=Livestock E=Enclosed
7	Trailer Length	6=6 feet long 9=9 feet long A=26 feet long
8	Trailer Axle configuration	1=Single Axle 2=2 Axles 3=3 Axles

Sample Tank Trailer Manufacturer's Lookup Table for the Second Section of the VIN (Positions 4-8)

VIN Position	Vehicle Attribute	Coding
4	Type of Trailer	A=NON-CODE B=NON-CODE ETM C=Reserved D=DRY BULK E=DOT 406 F=DOT 407 G=DOT 412 V=CONTAINER CHASSIS

6	Gallorage	0=Container Chassis 1=1000 > Gallons 2=1000 ≤ Gallons < 2000 3=2000 ≤ Gallons < 3000 4=3000 ≤ Gallons < 4000 5=4000 ≤ Gallons < 5000 ... 9=9000 ≤ Gallons < 10000 B=10000 ≥ Gallons
7	Trailer Length	6=6 feet long 9=9 feet long A=26 feet long
8	Trailer Axle configuration	1=Single Axle 2=2 Axles 3=3 Axles

Second Section VIN Character Restrictions

The amended VIN regulations no longer restrict Positions 4, 5, 6, or 8 to either alphabetic or numeric characters. This gives manufacturers more permutations for their vehicle attribute coding. However, as stated above, for passenger cars, and MPVs and trucks with a GVWR of 10,000 lbs. or less manufactured on or after April 30, 2009, Position 7 of the VIN must be alphabetic, which designates that the model year in Position 10 of the VIN refers to a year in the range of 2010-2039.

Third Section of the VIN

The third section of the VIN consists of one character, called the “check digit”, which occupies Position 9 in the VIN. The check digit’s purpose is to provide a means for verifying the accuracy of any VIN transcription. NHTSA regulations establish a mathematical formula for calculating the check digit.

After all other characters in VIN have been determined by the manufacturer, the check digit is calculated by carrying out the mathematical computation specified in the regulation.²³ First, each character in the VIN is assigned a “numerical value” as shown in Table III of the regulation, entitled “Assigned Values”.

49CFR 565.15(c)(1) Table III– Values Assigned to Characters of VIN

A	B	C	D	E	F	G	H	J	K	L	M	N	P	R	S	T	U	V	W	X	Y	Z
1	2	3	4	5	6	7	8	1	2	3	4	5	7	9	2	3	4	5	6	7	8	9

Each position of the VIN (except Position 9, the check digit) is assigned a “weight value” as shown in Table IV of the regulation, entitled “VIN Position and Weight Factor”.

49CFR 565.15(c)(2) Table IV– Weight Factors Assigned to VIN Positions 1-8 and 10-17

Position	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16	17
Weight	8	7	6	5	4	3	2	10	N/A	9	8	7	6	5	4	3	2

Next, each character’s numeric value is multiplied by the position’s weight value. After you compute several, the check digit mathematical calculations are not very difficult. Below is an example.

Position	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16	17
Sample VIN	1	J	9	R	P	1	A	3		A	1	6	4	4	3	4	5
Assigned Value	1	1	9	9	7	1	1	3		1	1	6	4	4	3	4	5
VIN Position Weight	8	7	6	5	4	3	2	10	N/A	9	8	7	6	5	4	3	2
Multiply Value by Weight	= 8	+ 7	+ 54	+ 45	+ 28	+ 3	+ 2	+ 30		+ 9	+ 8	+ 42	+ 24	+ 20	+ 12	+ 12	+ 10 = 314

²³ See 49 CFR 565.15, paragraphs (c) (1) through (4)

The results are now added together and the total “314” is then divided by 11.

$$8 + 7 + 54 + 45 + 28 + 3 + 2 + 30 + 9 + 8 + 42 + 24 + 20 + 12 + 12 + 10 = 314$$

$\begin{array}{r} 28 \\ 11 \overline{)314} \\ \underline{22} \\ 94 \\ \underline{88} \\ 6 \end{array}$	equals $28 \frac{6}{11}$	
$\frac{6}{11}$		

The total 314 is then divided by 11 = $28 \frac{6}{11}$ or 28.545454

The check digit is based on either the Fractional Remainder or the Decimal Equivalent Remainder as reflected in Table V of the regulation, entitled “*Ninth Position Check Digit Values*”.

49 CFR 565.15(c)(4) Table V – 9th Position Check Digit Values

6/11 or .545

Fractional Remainder	0	1/11	2/11	3/11	4/11	5/11	6/11	7/11	8/11	9/11	10/11
Decimal Equivalent Remainder	0	.091	.182	.273	.364	.455	.545	.636	.727	.818	.909
Check Digit	0	1	2	3	4	5	6	7	8	9	X

Check Digit “6”

All decimal equivalent remainders in Table V are rounded to the nearest thousandth (i.e., the 3rd digit to the right of the decimal point). If the 4th digit to the right of the decimal point is 5 or greater, round up; if 4 or less, round down.

In our total, 28.5454, the 4th digit to the right of the decimal point is 4, so round to 28.545. Table V shows that our decimal equivalent remainder “.545” equates to the check digit “6”.

A check digit, which can be zero through nine (0–9) or the letter “X”, appears in Position 9 of the VIN. Our computed check digit “6” will appear in Position 9 of our completed VIN: 1J9RP1A36A1644345. While the mathematical computations can be completed by hand, the agency recommends that new manufacturers develop a simple spreadsheet program to assist with calculating check digits and thereby reduce VIN errors. See Appendix 2 for a sample spreadsheet format to calculate VIN check digits.

Fourth Section

The fourth section of the VIN consists of Positions 10 through 17. Position 10 is reserved to encode the model year of the vehicle.

Fourth Section of the VIN - Model Year Placement

4 th Section								
MY	Plant	Number sequentially assigned in Positions 12-17 if a High-Vol. Manu. or in Positions 15-17 if a Low-Vol. Manu.						
10	11	12	13	14	15	16	17	
		WMI if low-vol. manufacturer ($<1,000$ of a given type each year)						
		##	##	##	##	##		
Note: ## means that the VIN Characters are: 0,1,2,3,4,5,6,7,8, or 9		if car, and MPV and truck $\leq 10,000$ lbs.						
		##	##	##	##			
		For vehicle <u>not</u> a car, and MPV and truck $\leq 10,000$ lbs. GVWR						

Besides the three letters that are not allowed in the VIN itself (I, O, and Q), the letters U and Z and the number 0 are not used for the year code. The model year is the year that a manufacturer uses to designate a discrete vehicle model, irrespective of the calendar year in which the vehicle was actually produced, provided that the production period does not exceed 24 months.²⁴ The year codes that must be used in the manufacturer's VIN are found in Table VII of the regulation, entitled "Year Codes for VIN".

49 CFR 565.15(d)(1) - Table VII – Required Year Codes for VIN

Year	2010	2011	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025	2026	2027	2028
Code	A	B	C	D	E	F	G	H	J	K	L	M	N	P	R	S	T	V	W

Position 11 of a VIN is used to encode the vehicle's plant of manufacture. This term is defined by the regulation as "the plant where the manufacturer affixes the VIN."²⁵ Manufacturers may assign their own plant codes, but should report to NHTSA, in their VIN deciphering information, the city, state, and country in which the plant of manufacture is located, as well as the name of the Plant (e.g., Lansing, Michigan, USA - GMNA). Plant Name is only a required field where applicable. If the manufacturer has no plant name, then it may be left off the submission. An example will show how VIN Positions 10 and 11 of the fourth section may be encoded.

²⁴ See 49 CFR 565.12(m)

²⁵ See 49 CFR 565.12(n)

Manufacturer's Sample VIN for the Fourth Section of the VIN (Positions 10-11)

Position	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16	17
Example										A	B						

Manufacturer's Lookup Table for the Fourth Section of the VIN (Positions 10 and 11)

VIN Position	Vehicle Attribute	Coding
10	Model Year	H=2017 J=2018 K=2019 (From Table VII of 49 CFR 565.15(d) (1))
11	Plant of Manufacture	B=Baltimore, MD USA – Main Plant F=Flint, MI USA – Flint Plant L=Lansing, MI USA - GMNA M=Lordstown, OH USA K=Bowling Green, KY USA R=Ramos Arizpe, Coahuila, Mexico

Positions 12 through 17 of the VIN represent the number sequentially assigned by the manufacturer in the production process if the manufacturer is a high-volume manufacturer. If the manufacturer is a low-volume manufacturer, Positions 12, 13, and 14 combined with Positions 1, 2, and 3 of the VIN uniquely identify the manufacturer. Please note that Positions 13 through 17 must be numeric, if the VINs are for passenger cars, MPVs, and trucks with a GVWR of 10,000 lbs. or less. For any othertype of vehicle, Positions 14 through 17 must be numeric.

4 th Section							
MY	Plant	Number sequentially assigned in Positions 12-17 if a High-Vol. Manu. or in Positions 15-17 if a Low-Vol. Manu.					
10	11	12	13	14	15	16	17
		WMI if low-vol. manufacturer (<1,000 of a given type each year)					
		##	##	##	##	##	##
Note: ## means that the VIN Characters are: 0,1,2,3,4,5,6,7,8, or 9		if car, and MPV and truck ≤ 10,000 lbs.					
		###	###	###	###	###	###
		For vehicle <u>not</u> a car, and MPV and truck ≤ 10,000 lbs. GVWR					

Manufacturer's Requirement to Furnish NHTSA with VIN Deciphering Information

It is very important that each manufacturer report to NHTSA its complete VIN deciphering information so that the agency may simplify vehicle identification information retrieval and increase the accuracy and efficiency of the vehicle recall campaigns. The VIN has become the key identifier in data systems that track compliance with Federal and state safety programs and that manage and analyze information on vehicle manufacturing processes, registrations, insurance programs, crash investigations, and safety research. Organizations that use VINs in data systems include NHTSA, manufacturers, state motor vehicle departments, law enforcement agencies, insurance companies, and motor vehicle safety researchers.

Under 49 CFR 565.26, a motor vehicle manufacturer must submit to NHTSA, either directly or through an agent, information the agency will need to decipher the manufacturer's VIN characters not later than 60 days before the manufacturer offers for sale the first vehicle identified by that VIN or if information concerning vehicle characteristics sufficient to specify the VIN code is unavailable to the manufacturer by that date, then within one week after that information first becomes available. The purpose of the 60-day requirement is to permit users of the VIN, such as State motor vehicle agencies, to obtain the necessary deciphering information before vehicle purchasers begin registering their vehicles. The VIN deciphering information must be submitted through the NHTSA Manufacturer Portal or by email at manufacturerinfo@dot.gov. See Appendix 3 for sample VIN deciphering letters.

Chapter 5. Certification to all Applicable FMVSS

Introduction

Vehicles manufactured for sale in the United States be certified to comply with all applicable FMVSS. NHTSA's regulations on motor vehicle certification are found at 49 CFR Part 567, while the regulations on the certification As noted above, the Vehicle Safety Act requires that regulated items of motor vehicle equipment and motor of motor vehicle equipment subject to the FMVSS are found within the standards that pertain to each such item of equipment, as published in 49 CFR Part 571, Subpart B.

Motor Vehicle Equipment Certification and NHTSA Assigned Codes

Motor vehicle equipment that is subject to an FMVSS must, as originally manufactured, conform to the standard and be so certified. In most instances, certification of compliance with the applicable FMVSS for regulated items of motor vehicle equipment is evidenced by the symbol "DOT" either inscribed on the equipment in a prescribed location or placed on the outside of the container in which the equipment is shipped.²⁶

Along with a marking that indicates certification of compliance with an applicable FMVSS, the fabricating manufacturer of certain regulated equipment items such as brake hoses, glazing (automotive glass and plastics), and tires must label its products with code marks or identification numbers assigned to the manufacturer by NHTSA.²⁷ NHTSA assigns an identification number to a manufacturer of tires or glazing (automotive glass and plastics) and accepts the designation of a brake hose manufacturer after the manufacturer submits an application to the National Highway Traffic Safety Administration through the Manufacturer Portal. See Appendix 7 for a description on how to use the NHTSA Manufacturer Portal²⁸. To avoid a delay in the issuance of NHTSA assigned code marks or identification numbers, it is wise to comply with the requirements to designate a U.S. resident as agent for service of process if the fabricating manufacturer is not located in the United States.

This is accomplished by submitting the appropriate form to the NHTSA Office of Chief Counsel. See Chapter 3, Paragraph B and Appendix 1 of this document for the Part 551 requirements and form.

Requirements for certification markings on equipment items are found in the individual standards that apply to those items, as published in 49 CFR Part 571. For example, FMVSS No. 205 requires a glazing manufacturer to

²⁶ See 49 U.S.C. §§ 30112 and 30115

²⁷ See 49 CFR 571.106, paragraph S5.2.2(b), relating to brake hoses; 49 CFR 571.205, paragraph S6.2, relating to glazing; and 49 CFR 574.5, relating to tires

²⁸ See <http://vpic.nhtsa.dot.gov/MfrPortal/>

certify its glazing by adding to the marks required by section 7 of ANSI/SAE Z26.1–1996,²⁹ in letters and numerals of the same size, the symbol “DOT” and a manufacturer’s code mark that NHTSA assigned to the glazing manufacturer.

Motor Vehicle Certification

A motor vehicle must be manufactured to comply with all applicable FMVSS and bear a label certifying such compliance that is permanently affixed (riveted or affixed in such a manner that it cannot be removed without destroying or defacing it) by the vehicle’s manufacturer (i.e., the actual assembler of the vehicle).³⁰ Certification labeling requirements are necessary to establish that the vehicle was manufactured to comply with all applicable FMVSS. Because the label also identifies the type of classification of the vehicle, it also helps to identify which of the FMVSS, Bumper Standards (49 CFR Part 581), and Federal Theft Prevention Standards (49 CFR Part 541) apply to the vehicle.

Motor Vehicle Certification Labels

Placement of the Certification Label³¹

For vehicles other than trailers and motorcycles, the manufacturer’s certification label must be affixed to either the hinge pillar, door-latch post, or the door edge that meets the door-latch post, next to the driver’s seating position, or if none of these locations is practicable, to the left side of the instrument panel. If that location is also not practicable, the label must be affixed to the inward-facing surface of the door next to the driver’s seating position.³² The location of the label must be such that it is easily readable without moving any part of the vehicle except an outer door.

The manufacturer’s certification label for trailers must be affixed to a location on the forward half of the left side, such that it is easily readable from outside the vehicle without moving any part of the vehicle. The certification label for motorcycles must be affixed to a permanent member of the vehicle as close as is practicable to the intersection of the steering post with the handlebars, in a location such that it is easily readable without moving any part of the vehicle except for the steering system. This label is the only location on a motorcycle that must show the VIN.

Motor Vehicle Certification Label Content

The motor vehicle certification label, among other things, identifies the vehicle’s manufacturer (i.e., the actual assembler of the vehicle), states the vehicle’s date of manufacture (month and year), Gross Vehicle Weight Rating or GVWR, Gross Axle Weight Rating or GAWR of each axle, vehicle type classification (e.g., MPV, truck), and VIN. For multipurpose passenger vehicles and trucks with a GVWR of 6,000 pounds or less, the label must contain the statement: *“This vehicle conforms to all applicable Federal motor vehicle safety and theft prevention standards in effect on the date of manufacture shown above.”* For passenger cars, the label must contain the statement *“This vehicle conforms to all applicable Federal motor vehicle safety, bumper, and theft prevention standards in effect on the date of manufacture shown above.”* For all other vehicles, the label must contain the statement: *“This vehicle conforms to all applicable Federal motor vehicle safety standards in effect on the date of manufacture shown above.”*

²⁹ See 49 CFR 571.205 S3.2, entitled “Incorporation by Reference” wherein it states: (a) “American National Standard for Safety Glazing Materials for Glazing Motor Vehicles and Motor Vehicle Equipment Operating on Land Highways—Safety Standard” ANSI/SAE Z26.1–1996, Approved by American National Standards Institute August 11, 1997 (ANSI/SAE Z26.1–1996) is incorporated by reference in Section 5.1 and is hereby made part of this Standard

³⁰ See 49 U.S.C. §§ 30112 and 30115, and 49 CFR part 567

³¹ See 49 CFR 567.4(c), (d), and (e)

³² If none of the preceding locations is practicable, notification of that fact, together with drawings or photographs showing a suggested alternate location in the same general area, shall be submitted for approval to the Administrator, National Highway Traffic Safety Administration, 1200 New Jersey Avenue SE, Washington, D.C. 20590

Certification Requirements for Vehicles Manufactured in Two or More Stages

A “completed” vehicle is one that requires no further manufacturing operations to perform its intended function. An “incomplete” vehicle is an assemblage consisting, at a minimum, of chassis (including the frame) structure, power train, steering system, suspension system, and braking system, in the state that those systems are to be part of the completed vehicle but requires further manufacturing operations to become a completed vehicle. An incomplete trailer is also an incomplete vehicle.³³ Manufacturers of incomplete vehicles must furnish at or before the time of delivery an incomplete vehicle document or “IVD” that contains, among other things, a list of each FMVSS applicable to the incomplete vehicle’s type classification and a statement whether the vehicle will or will not conform to each applicable FMVSS, or that FMVSS conformance cannot be determined.³⁴

Additionally, incomplete vehicle manufacturers must generally affix to their vehicles a label that identifies the incomplete manufacturer, the vehicle’s date of manufacture (month and year), its GVWR, GAWR, and VIN.

A final-stage manufacturer is a person who performs such manufacturing operations on an incomplete vehicle that it becomes a completed vehicle. An intermediate manufacturer is a person, other than the incomplete vehicle manufacturer or the final-stage manufacturer, who performs manufacturing operations on a vehicle manufactured in two or more stages.³⁵ Both the final-stage and intermediate manufacturers assume legal responsibility for all certification-related duties and liabilities under the Vehicle Safety Act with respect to components and systems they install or supply for installation on the incomplete vehicle, unless changed by a subsequent manufacturer. Both have responsibility to further manufacture or complete the vehicle in accordance with the IVD furnished by the incomplete vehicle manufacturer.

The intermediate manufacturer must affix a label that identifies that manufacturer, states the vehicle’s GVWR, GAWR, and VIN, and identifies the month and year in which the intermediate manufacturer performed its last manufacturing operation on the incomplete vehicle.

The final-stage manufacturer must affix a label that identifies that manufacturer, states the vehicle’s GVWR, GAWR, vehicle type classification, and VIN, and identifies the vehicle’s date of manufacture (month and year). The date selected must be the date of manufacture of the incomplete vehicle, the date of final completion, or a date between those two dates. The label must also contain one of the following three alternative certification statements:³⁶

1. *“This vehicle conforms to all applicable Federal Motor Vehicle Safety Standards, [and Bumper and Theft Prevention Standards, if applicable] in effect in (month, year).”*
2. *“This vehicle has been completed in accordance with the prior manufacturers’ IVD, where applicable. This vehicle conforms to all applicable Federal Motor Vehicle Safety Standards, [and Bumper and Theft Prevention Standards, if applicable] in effect in (month, year).”*
3. *“This vehicle has been completed in accordance with the prior manufacturers’ IVD, where applicable, except for [insert FMVSS]. This vehicle conforms to all applicable Federal Motor Vehicle Safety Standards, [and Bumper and Theft Prevention Standards if applicable] in effect in (month, year).”*

³³ See 49 CFR 567.3

³⁴ See 49 CFR 568.4(a) and (b)

³⁵ See 49 CFR 567.3

³⁶ See 49 CFR 567.5(d)

Certification label content requirements for each manufacturer are summarized in Table 4.

Table 4-Certification Label Content Requirements by Manufacturer Type

Manufacturer Type	Company's Name	Date of Manufacture	GVWR	GAWR	Vehicle Type	VIN	Certification Statement Source
Completed Vehicle	Yes	Yes	Yes	Yes	Yes	Yes	Yes, 1 of 3 567.4(g)
Incomplete Vehicle	Yes	Yes	Yes	Yes	No	Yes	No, IVD 567.5(b)(2)
Intermediate	Yes	Yes	Yes	Yes	No	Yes	No 567.5 (c)(2)
Final-stage	Yes	Yes	Yes	Yes	Yes	Yes	Yes, 1 of 3 567.5(d)(2)

Sample manufacturers' certification labels covering a motorcycle, trailer, low-speed vehicle, multipurpose passenger vehicle, truck, and passenger car are provided in Appendix 3.

Certification Label Suppliers

NHTSA does not endorse any certification label suppliers or their products; however, companies known to the agency that supply such products to motor vehicle manufacturers are identified in Appendix 5.

Chapter 6. The Federal Motor Vehicle Safety Standards

FMVSS Issuance

NHTSA is authorized by the Vehicle Safety Act to issue safety standards that set minimum performance requirements for new motor vehicles and for certain items of motor vehicle equipment. Such standards must be practicable, meet the need for motor vehicle safety, and be stated in objective terms. The FMVSS specify the minimum performance requirements, and, in general terms, the objective tests required to demonstrate product compliance.

FMVSS Organization under 49 CFR Part 571

The FMVSS are generally organized under Vehicle Crash Avoidance (Series 100), Crashworthiness (Series 200)³⁷, Post-Crash Protection (Series 300), Miscellaneous (Series 400), Low-Speed Vehicles (Series 500), or Equipment standards. All FMVSS are found in 49 CFR Part 571, Subpart B, and are numbered to correspond to the FMVSS number. For example, FMVSS No. 101 *Controls and Displays* is found in 49 CFR 571.101.

Because manufacturers are responsible for "self-certifying" that their products meet all applicable FMVSS before those products can be offered for sale, it is important for a manufacturer to be knowledgeable about the performance requirements of each FMVSS applicable to its products. NHTSA encourages manufacturers to conduct tests as specified in certain of the FMVSS. Manufacturers should also be familiar with the laboratory test procedures that NHTSA uses to evaluate the compliance of their products with each FMVSS. These may be found on the NHTSA web site.³⁸

³⁷ Crashworthiness means the protection a passenger motor vehicle gives its passengers against personal injury or death from a motor vehicle crash

³⁸ See <http://www.nhtsa.gov/Vehicle+Safety/Test+Procedures>

FMVSS Applicability

A paragraph within each FMVSS identifies the types of vehicles or equipment items to which the standard applies. For example, Paragraph S3 of 49 CFR 571.101 states that FMVSS No. 101 *Controls and Displays* applies to passenger cars, multipurpose passenger vehicles, trucks, and buses. Certain FMVSS requirements apply only to vehicles above or below a specified GVWR. For example, FMVSS No. 201 *Occupant Protection in Interior Impact* applies to passenger cars, multipurpose passenger vehicles, trucks, and buses with a GVWR of 10,000 pounds (4,536 kilograms) or less.³⁹ Other FMVSS requirements may not apply to certain specialty vehicles. For example, FMVSS No. 225 *Child Restraint Anchorage Systems* does not apply to walk-in van-type vehicles, vehicles manufactured to be sold exclusively to the U.S. Postal Service, shuttle buses, and funeral coaches.⁴⁰

Reference Table Identifying FMVSS Applicability by Vehicle Type and Equipment Items

To assist manufacturers, NHTSA has created a ready reference table to show FMVSS applicability by motor vehicle type classification and motor vehicle equipment item. See Appendix 8. As FMVSS are adopted or amended, they are assigned effective dates. It is therefore wise to check the most up-to-date version of 49 CFR Part 571, Subpart B for regulatory amendments.

Chapter 7. Tire Information Labeling Requirements

FMVSS No. 110 specifies, among other things, requirements for tire selection to prevent tire overloading. The standard applies to vehicles with a GVWR of 10,000 pounds (4,536 kilograms) or less, except for motorcycles, low-speed vehicles, and incomplete vehicles.⁴¹ Manufacturers are required to permanently affix a tire placard in a specified location on the vehicle. The placard provides consumers with tire and loading information, including the vehicle's seating capacity and weight. An example of the required placard is shown in Figure 1.

Figure 1 – Tire Placard

³⁹ See 49 CFR 571.201 paragraph S2

⁴⁰ See 49 CFR 571.225 paragraph S2

Chapter 8. Duty to Notify NHTSA of a Noncompliance with an FMVSS or a Safety-Related Defect

Notwithstanding its certification of a product, a manufacturer may subsequently determine that a noncompliance with an FMVSS or a safety-related defect exists in a motor vehicle or a motor vehicle equipment item it has produced. Manufacturers have a duty to notify NHTSA if they learn the vehicle or equipment contains a defect and in good faith they decide that the defect is related to motor vehicle safety, or in good faith they decide that the vehicle or equipment does not comply with an applicable FMVSS.⁴² The manufacturer must notify NHTSA within five working days after determining the existence of a noncompliance or a safety-related defect.⁴³ Alternately, NHTSA may determine the existence of a noncompliance or a safety-related defect in a particular motor vehicle or motor vehicle equipment item and order the responsible manufacturer to recall the product.⁴⁴

Chapter 9. Duty to Notify Owners and Dealers and Provide a Remedy for a Noncompliance or a Safety-Related Defect

Regardless of whether the noncompliance with an FMVSS or a safety-related defect is determined to exist by the manufacturer or by NHTSA, the manufacturer must provide owners and dealers of the affected products with notification of the noncompliance or defect and must remedy the noncompliance or defect, usually without charge.⁴⁵ The notification and remedy process is commonly referred to as a “safety recall campaign” or more simply as a “recall.” NHTSA monitors the remedy program to ensure its successful completion. The agency is not authorized to expend its funds on recalls; the expense of notifying owners and providing a remedy must be borne by the fabricating manufacturer and/or importer of the products found to contain the noncompliance or defect.⁴⁶ Manufacturers are encouraged to contact NHTSA at 202-366-5210 or review the agency’s web site for more comprehensive information. See <http://www-odi.nhtsa.dot.gov/>.

Chapter 10. Record Keeping for Manufacturers

Tires

A new tire manufacturer is required by NHTSA regulations to permanently mold into each tire intended for use on a motor vehicle a “tire identification number” or “TIN.”⁴⁷ Tire distributors and dealers that are owned or controlled by tire manufacturers are required to send to the tire manufacturers, records of any new tires they sell, including the TINs of the tires and the name and address of the tire purchasers. Independent tire distributors or dealers are required to furnish tire registration forms that identify the TIN and the tire distributor or dealer’s name and address to the purchasers of new tires, who may then mail the forms to the tire manufacturer. See Appendix 9 for a sample tire registration form. Instead of furnishing the tire purchaser with a registration form, independent tire distributors or dealers may electronically transmit tire purchaser and tire registration information to the tire manufacturer by secure means, as identified or authorized by the manufacturer.

Tire manufacturers must maintain information from the registration forms for a period of not less than 5 years from the date on which the information is recorded. Motor vehicle manufacturers are required to maintain records of the TINs for the tires installed on their vehicles and the name and address of the first purchasers of their vehicles for 5 years from the date that the vehicles are sold. These requirements are intended to ensure that purchasers receive proper notification in the event that a tire is recalled to remedy a noncompliance or safety-related defect.⁴⁸

⁴² See 49 U.S.C. 30118(c)

⁴³ See 49 CFR 573.6

⁴⁴ See 49 U.S.C. 30118(b)

⁴⁵ See 49 CFR Part 577

⁴⁶ See 49 U.S.C. §§ 30118 - 30120

⁴⁷ See 49 CFR Part 574.5

⁴⁸ See 49 CFR Part 574

Child Restraints

In like manner, the manufacturer of a child restraint system (i.e., a child safety seat), other than one installed on a vehicle as newly manufactured, must furnish a registration form to be completed by the owners of those seats and retain information from the form for a period of not less than 6 years to ensure that the owners receive proper notification of a recall campaign.⁴⁹

Motor Vehicles and Equipment

NHTSA regulations also require manufacturers of motor vehicles and motor vehicle equipment to retain claims, complaints, reports, and other records concerning alleged and proven defects and malfunctions that may be related to motor vehicle safety for a period of five calendar years from the date on which they were generated or acquired by the manufacturer.⁵⁰ Under this regulation, “malfunctions that may be related to motor vehicle safety” are defined as including any failure or malfunction beyond normal deterioration in use, or any failure of performance, or any flaw or unintended deviation from design specifications, that could in any reasonably foreseeable manner be a causative factor in, or aggravate, a crash or an injury to a person. This regulation also describes the records that manufacturers must maintain, including all documentary materials, films, tapes, and other information-storing media that contain information concerning malfunctions that may be related to motor vehicle safety. The section describes such records as including, but not being limited to, reports and other documents, including material generated or communicated by computer, telefax or other electronic means, that are related to work performed under warranties; and any lists, compilations, analyses, or discussions of such malfunctions contained in internal or external correspondence of the manufacturer, including communications transmitted electronically.

Chapter 11. Early Warning Reporting

Manufacturers must submit quarterly reports to NHTSA under the agency’s Early Warning Reporting (EWR) regulations that implement the Transportation Recall Enhancement, Accountability, and Documentation (TREAD) Act of 2000. These regulations require manufacturers to submit information that could assist the agency in determining whether a safety-related defect exists in a vehicle or equipment item used in the United States.⁵¹ The regulations divide manufacturers of motor vehicles and motor vehicle equipment into two groups with different responsibilities for reporting information that could indicate the existence of potential safety-related defects.

The first group comprises motor vehicle manufacturers that meet certain production thresholds, tire manufacturers that produce more than a certain number of tires by tire line, and all manufacturers of child restraint systems. Manufacturers of light vehicles, motorcycles, trailers, and medium-heavy vehicles (except buses and emergency vehicles) that produced, imported, offered for sale, or sold 5,000 or more vehicles of a category annually in the United States are required to furnish NHTSA with comprehensive reports every calendar quarter. Emergency vehicle manufacturers must report if they produced, imported, offered for sale, or sold 500 or more vehicles annually, and bus manufacturers must report if they produced, imported or offered for sale, or sold 100 or more buses annually in the United States. Manufacturers of passenger car, light truck, and motorcycle tires are also required to provide comprehensive quarterly reports if they produced, imported, offered for sale, or sold 15,000 or more tires in a tire line. This group of manufacturers must generally report to NHTSA production-related information, incidents related to a death or injury, consumer complaints, warranty claims (warranty adjustments for tires), property damage claims, and field reports.

The second group comprises all other manufacturers of motor vehicles and motor vehicle equipment (i.e., vehicle manufacturers that produce, import, or sell annually in the United States fewer than 5,000 light vehicles, motorcycles, trailers, and medium-heavy vehicles (excluding emergency vehicles and buses); manufacturers that produce, import, or sell annually in the United States fewer than 500 emergency vehicles; manufacturers that produce, import, or sell annually in the United States fewer than 100 buses; manufacturers of original motor vehicle equipment; and manufacturers of replacement motor vehicle equipment other than child restraint systems and tires).

⁴⁹ See 49 CFR Part 588

⁵⁰ See 49 CFR Part 576

⁵¹ See 49 CFR Part 579, Subpart C

These manufacturers must submit a report if they receive a claim or notice related to an incident involving a death but are not required to report any other information under the EWR rule. Manufacturers are encouraged to contact NHTSA at 202-366-4238 or review the agency's web site for more comprehensive EWR information. See <https://www.nhtsa.gov/vehicle-manufacturers/early-warning-reporting>.

Under other NHTSA regulations, all vehicle and equipment manufacturers in both groups must provide copies of all documents sent or made available to more than one dealer, distributor, owner, purchaser, lessor or lessee, in the United States concerning customer satisfaction campaigns, consumer advisories, recalls, or other activities involving the repair or replacement of vehicles or equipment.⁵² A manufacturer must also report safety recalls and other safety campaigns it conducts in a foreign country that cover a motor vehicle, an item of motor vehicle equipment, or a tire that is identical or substantially similar to such a product offered for sale or sold in the United States.⁵³

Chapter 12. Other Statutory/Regulatory Requirements

Manufacturers should be aware that NHTSA administers additional statutes and regulations related to motor vehicles and motor vehicle equipment. These include:

Theft Prevention

This statute and implementing regulations require motor vehicle manufacturers to affix or inscribe anti-theft identification markings to major parts and replacement parts for certain lines of passenger cars, light trucks and MPVs designated as high theft lines. See 49 U.S.C. Chapter 331 and 49 CFR Parts 541-543.

Bumper Standards

This statute and implementing regulations establish standards to reduce physical damage to the front and rear of passenger motor vehicles from low-speed collisions. See 49 U.S.C. Chapter 325 and 49 CFR Part 581.

Fuel Economy

This statute and implementing regulations require manufacturers to comply with the applicable average fuel economy standards. See 49 U.S.C. Chapter 329 and 49 CFR Parts 525, 526, 529, 531, 533, 535, 537, and 538.

Domestic Content Labeling

This statute and implementing regulations establish requirements for the disclosure of information relating to the countries of origin of the equipment on new passenger motor vehicles. See 49 U.S.C. Chapter 323 and 49 CFR Part 583.

Consumer Information

This statute and implementing regulations establish requirements for the disclosure of information in the owner's manual of a motor vehicle relating to tires and the Uniform Tire Quality Grading program and the reporting of possible safety defects to NHTSA.

Owner's manuals of special vehicles such as slide-in campers and trucks that are capable of accommodating slide-in campers must also contain certain consumer information.⁵⁴ For certain vehicles, manufacturers are required to affix a Rollover Warning label⁵⁵ and to label the vehicle with New Car Assessment Program Safety Rating information.⁵⁶ See 49 U.S.C. Chapter 323 and 49 CFR Part 575.

⁵² See 49 CFR 579.5 and 579

⁵³ See 49 CFR Part 579, Subpart B

⁵⁴ See 49 CFR 575.103

⁵⁵ See 49 CFR 575.105

⁵⁶ See 49 CFR 575.301

Chapter 13. NHTSA Contacts

Table 5 provides NHTSA contact numbers and Internet resources to help answer questions about the information presented in the previous sections.

Chapter 15. Helpful Hints

Manufacturer's Statements of Origin or Certificates of Origin

NHTSA is not responsible for titling or registering motor vehicles or for regulating the operation of motor vehicles on public roads in the United States. That is instead the responsibility of the individual States. Some States may require a manufacturer's certificate of origin (MCO) or manufacturer's statement of origin (MSO) to register a new motor vehicle. These are not federally required documents. NHTSA, therefore, is not in a position to offer guidance to prospective vehicle manufacturers or vehicle purchasers on obtaining a needed MCO or MSO. For assistance, please contact your State's Department of Motor Vehicles (DMV).

Engineering reports for motorcycles and motorcycle frames are available on a fee basis through the SAE. See that organization's web site at www.sae.org.

Appendices

Appendix 1 - Part 551- Designate a permanent resident of the United States as its agent for service of process.

OMB No. 2127-0040
Expiration Date: 07/31/2009

Paperwork Reduction Act Burden Statement

A federal agency may not conduct or sponsor, and a person is not required to respond to, nor shall a person be subject to a penalty for failure to comply with a collection of information subject to the requirements of the Paperwork Reduction Act unless that collection of information displays a current valid OMB Control Number. The OMB Control Number for this information collection is 2127-0040. Public reporting for this collection of information is estimated to be approximately 30 minutes per response, including the time for reviewing instructions, completing and reviewing the collection of information. All responses to this collection of information are mandatory. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden to: Information Collection Clearance Officer, National Highway Traffic Safety Administration, 1200 New Jersey Avenue, SE, Washington, D.C. 20590.

SUGGESTED DESIGNATION OF AGENT FOR SERVICE OF PROCESS UNDER 49 U.S.C. § 30164 and 49 C.F.R. Part 551, Subpart D

PART A: DESIGNATION BY FOREIGN MANUFACTURER

Pursuant to 49 U.S.C. § 30164 and 49 C.F.R. Part 551, Subpart D, the Foreign Manufacturer listed below hereby designates the following Agent on whom service of all administrative and judicial processes and notices may be made. This designation is for service of process only and for no other purpose. It shall remain in effect until it is withdrawn or another Agent is designated in accordance with the requirements of 49 U.S.C. § 30164 and 49 C.F.R. Part 551, Subpart D.

The Manufacturer identified below hereby certifies:

1. This designation is in valid form and binding on the Manufacturer under the laws, corporate bylaws or other requirements governing the making of designations at the place and time where it is made.
2. The full legal name, principal place of business and mailing address of the Manufacturer are:

3. The Manufacturer's products will be sold under the following trade or brand names, marks, logos or other designations of origin (**List all names, marks, logos or designations**): _____

4. The full legal name, principal place of business, mailing address and telephone number of the Agent are: _____

By:

Signature of Manufacturer's Authorized Representative

_____/_____/_____
Month / Day / Year

Printed Name

Title

[Note: Part B of the form continues on the next page]

PART B: ACCEPTANCE BY AGENT

The undersigned hereby accepts appointment as Agent solely for the purpose of service of process on the Manufacturer under 49 U.S.C. § 30164 and 49 C.F.R. Part 551, Subpart D. I understand that this appointment shall remain in effect until withdrawn or replaced by the Manufacturer in accordance with the requirements of 49 U.S.C. § 30164 and 49 C.F.R. Part 551, Subpart D. I understand also that I may not assign performance of my functions under this Designation to another person.

By: _____ / /
 Signature of Agent Month / Day / Year
(Date of acceptance must be on or after date of designation)

 Printed Name

 Title

Mail original documents with ink signatures only to: U.S. Department of Transportation, NHTSA
 Correspondence Unit, 1200 New Jersey Avenue, SE, Room W41-306, Washington, D.C. 20590

Please note that:

- Manufacturers must submit to NHTSA **original**, fully executed designation forms with **ink signatures**. NHTSA will not accept copies of designation forms, facsimiles, emails, emailed PDF files, or forms that do not contain original ink signatures.
- The date of acceptance by an agent must be **on or after** the date of designation by a foreign manufacturer.
- Designation forms must be submitted to U.S. Department of Transportation, NHTSA Correspondence Unit, 1200 New Jersey Avenue, SE, Room W41-306, Washington, D.C. 20590. No other NHTSA office is authorized to accept designation documents. To avoid delays, the agency suggests using express mail services.

Questions?

For further assistance or with questions about the requirements of Part 551, Subpart D, please email Ms. Jin Kim at Jin.Kim@dot.gov.

Appendix 6 – How to Search NHTSA’s Manufacturers’ Information Database

The Manufacturer’s Information Database (MID) can be found through the NHTSA Product Information and Catalog Listing (vPIC) website available at <https://vpic.nhtsa.dot.gov/>. vPIC is a consolidated platform that presents data collected within the manufacturer reported data from 49 CFR Parts 551 – 574 for use in a variety of modern tools. NHTSA’s vPIC platform is intended to serve as a centralized source for basic Vehicle Identification Number (VIN) decoding, Manufacturer Information Database (MID), Manufacturer Equipment Plant Identification and associated data.

The vPIC home page has resource links pointing towards the Code of Federal Regulations for which data is collected through vPIC Manufacturer Portal. A link to *New Manufacturers Handbook* can also be found under *Resource Links* section.

To go to MID website, click the light blue **vPIC MID** button on the right side of the screen.

Product Information Catalog and Vehicle Listing (vPIC) Powered by

Welcome to vPIC

The NHTSA Product Information Catalog and Vehicle Listing (vPIC) is a consolidated platform that presents data collected within the manufacturer reported data from 49 CFR Parts 551 – 574 for use in a variety of modern tools. NHTSA’s vPIC platform is intended to serve as a centralized source for basic Vehicle Identification Number (VIN) decoding, Manufacturer Information Database (MID), Manufacturer Equipment Plant Identification and associated data.

[More Info >](#)

vPIC is intended for use on Model Years 1981 and forward. Vehicles prior to 1980’s VIN standard are not included in decoding capability for the system. vPIC Patterns are based on Vehicle Identification Number (VIN) specifications received from the manufacturers following the 565 standard.

For any additional information and questions: Contact NHTSA Manufacturer Helpdesk at manufacturerinfo@dot.gov or 1-888-399-3277

Manufacturer Portal : Online Web-based Submittal Center

- Submit new or revised form for:
 - VIN Requirements (49 CFR Part 565)
 - Manufacturer Identification (49 CFR Part 566; Routine Identification Data)
 - Designation of U.S. Agent of Service of Process (49 CFR Part 551, Subpart D)
 - Brake Hose Manufacturer Identification (49 CFR Part 571.106)
 - Glazing Material Manufacturer Identification (49 CFR Part 571.205)
 - New Tire Manufacturer Identification (49 CFR Part 574)
 - Retread Tire Manufacturer Identification (49 CFR Part 574)
 - Adapted Vehicle Modifier (49 CFR Part 595)
 - Replica Motor Vehicles (49 CFR Part 586)
 - Replica Motor Vehicles - Annual report (49 CFR Part 586.12)
- Check the status for already submitted requests.

MID : Manufacturer Information Database

- View manufacturer information (Address, Products Manufactured, Makes, etc.)
- View or download documents submitted to NHTSA by Manufacturers as it relates to 49 CFR Part 566, 49 CFR Part 565 and 49 CFR Part 574.
- Obtain World Manufacturer Identifiers (WMIs) assigned to a manufacturer assigned by SAE and referenced in vPIC.

[vPIC MID](#)

Manufacturer's Information Database (MID) can be searched to:

- View the manufacturer information (Address, Products Manufactured, Makes, etc.) for manufacturers registered with NHTSA.
- View or download documents submitted to NHTSA by manufacturers as it relates to 49 CFR Part 566 (Manufacturer Identification), 49 CFR Part 565 (VIN Deciphering Document), 49 CFR Part 574 (Tire Identification Number (TIN) Guidance), 49 CFR Part 571.106 (Brake Hose Manufacturer Identification), 49 CFR Part 571.205 (Glazing Material Manufacturer Identification) and 49 CFR Part 586 (Replica Motor Vehicles)
- Obtain World Manufacturer Identifiers (WMIs) assigned to a manufacturer assigned by SAE and referenced in vPIC.

Manufacturer ID or *Name* can be used to search for a manufacturer. *Manufacturer ID* is the unique ID generated by the vPIC system when a manufacturer is registered with NHTSA through the 49 CFR Part 566 process. If you know the ID of the manufacturer you are searching for, use *Manufacturer ID* as the search criteria to get the results only for that manufacturer. When using *Name* as the search criteria, it is advisable to use the partial name for getting better results. The check boxes for *Part 565* and *Part 566* are checked by default. Uncheck these boxes if Part 565 and Part 566 results are not needed as part of the search criteria. In the example below, the *Name* entered is "ACME" and the *Part 565* and *Part 566* boxes are checked. Click the blue **Search** button to get the results.

Search Criteria

Hint: Multiple search criteria is treated as an "AND". To increase search results, enter fewer search criteria. Likewise, to reduce search results enter more search criteria.

The WMI search results page shows the details of the WMI searched for.

WMIs listed within this table have been officially registered through the Part 565 process with NHTSA for use and importation into the US for operation on US roads. If the WMI you are looking for is not shown in the search results, that means the WMI is not submitted to NHTSA through the Part 565 process. For 565 submissions, please contact NHTSA's Manufacturer Helpdesk at manufacturerinfo@dot.gov. NHTSA only accept WMIs that are registered with SAE International. If your WMI is not registered with SAE, please contact wmi@SAE.org.

---	---

A 566 submittal covers the manufacturer and product information and proceeds as shown below. On top of the page is a guide that shows the progress of the submission as it is completed. The manufacturer must fill out the form below with all required information before moving on to the next section titled, *ManufacturingDetails*.

Domestic Manufacturers (49 CFR Part 566)

Step 1: Basic Manufacturer Information	Step 2: Additional Details	Step 3: Manufacturing Details	Step 4: Documents (Optional)	Step 5: Review and Confirmation
---	--------------------------------------	----------------------------------	---------------------------------	------------------------------------

PAPERWORK REDUCTION ACT STATEMENT: A federal agency may not conduct or sponsor, and a person is not required to respond to, nor shall a person be subject to a penalty for failure to comply with, a collection of information subject to the requirements of the Paperwork Reduction Act unless that collection of information displays a current valid OMB Control Number. The OMB Control Number for this information collection is 2127-0043 (Expiration Date: XXXXXX). This is a mandatory information collection that covers the submission of manufacturer identification information. Under 49 CFR Part 566, manufacturers of motor vehicles and certain items of motor vehicle equipment are required to submit identifying information to the National Highway Traffic Safety Administration (NHTSA) within 30 days of beginning manufacturing of motor vehicles or items of motor vehicle equipment subject to the Federal motor vehicle safety standards or 30 days prior to importing motor vehicles or items of motor vehicle equipment. The information is only submitted once unless the information in the original submission needs to be updated. NHTSA uses this information to contact manufacturers and also makes this information available to the general public on a NHTSA website. The purpose of this information collection is to ensure that NHTSA is able to identify manufacturers and their products and locate the manufacturer if a safety-related defect or noncompliance is suspected or found to exist in a motor vehicle or motor vehicle equipment. This ensures that NHTSA can administer and enforce recall of vehicles that do not comply with the FMVSS or contain safety-related defects. NHTSA estimates the burden associated with this submission to be 15 minutes. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden to: Information Collection Clearance Officer, National Highway Traffic Safety Administration, 1200 New Jersey Ave, S.E., Room W45-205, Washington, DC, 20590.

In *Step 3*, the manufacturers must select what type of *manufacturer*, *alterer*, or *importer* their company is. Multiple boxes can be checked as needed. Click the **Save & Continue** button to proceed.

Domestic Manufacturers (49 CFR Part 566)

Step 1: Basic Manufacturer Information	Step 2: Additional Details	Step 3: Manufacturing Details	Step 4: Documents (Optional)	Step 5: Review and Confirmation
---	-------------------------------	----------------------------------	---------------------------------	------------------------------------

What Type of Manufacturer or Alterer is Your Company?

Note: If you are a complete vehicle manufacturer, you must also submit VIN deciphering CFR 49 Part 565 (check all that apply)

- Completed Vehicle Manufacturer** - a manufacturer of vehicles that require no further manufacturing operations to perform their intended function
- Incomplete Vehicle Manufacturer** - a manufacturer of incomplete vehicles. Incomplete vehicle means an assemblage consisting, at a minimum, of chassis (including the frame) structure, power train, steering system, suspension system, and braking system, in the state that those systems are to be part of the completed vehicle, but requires further manufacturing operations to become a completed vehicle. Also means an incomplete trailer.
- Intermediate Vehicle Manufacturer** - a manufacturer (other than the incomplete vehicle manufacturer or final-stage manufacturer) who performs manufacturing operations on a vehicle manufactured in two or more stages.
- Final-Stage Vehicle Manufacturer** - a manufacturer who performs such manufacturing operations on an incomplete vehicle that it becomes a completed vehicle
- Vehicle Alterer** - a person who alters by addition, substitution, or removal of components (other than readily attachable components), a certified vehicle before the first purchase of the vehicle other than for resale
- Fabricating Manufacturer of Motor Vehicle Equipment** - a person that manufactures or assembles motor vehicle equipment
- Importer of Motor Vehicle Equipment** - a person that imports motor vehicle equipment for resale
- Importer of Motor Vehicles Originally Manufactured to Conform to FMVSS** - a person that imports motor vehicles originally manufactured to conform to FMVSS for resale as distinguished from registered importers subject to the duties specified in 49 CFR Part 592
- Replica Vehicle Manufacturer** - a manufacturer that is registered as a replica motor vehicle pursuant to 49 CFR Part 586. (This selection should also be made by prospective replica manufacturers prior to submitting Part 586 registration information. If your Part 586 registration is approved, NHTSA will notify you that your 566 has been updated with your status as a replica vehicle manufacturer. Once your 566 submission is accepted, you will be notified to submit 586 application.)

Vehicle manufacturers, alterers, and importers must select all *Vehicle Types*, *GVWR From* and *GVWR To* range for each Vehicle Type produced, altered, or imported by their company. A brief description of the vehicle is required for Truck, Trailer, Multipurpose Passenger Vehicle (MPV), and Incomplete vehicle types and recommended for other vehicle types.

What Types of Vehicles Does Your Company Manufacture or Alter? * Fill out this section only if you are a vehicle manufacturer
Please identify the approximate GVWR Range in pounds (check all that apply)

[Remove Primary](#)

Select Vehicle Type	Description of Vehicle	Primary	GVWR From	GVWR To
<input type="checkbox"/> Motorcycle		<input type="radio"/>		
<input checked="" type="checkbox"/> Passenger Car		<input type="radio"/>	Class 1C: 4,001 - 1	Class 1D: 5,001 - 6,000 lb (2,268)
<input type="checkbox"/> Truck		<input type="radio"/>		
<input type="checkbox"/> Bus		<input type="radio"/>		
<input type="checkbox"/> Trailer		<input type="radio"/>		
<input type="checkbox"/> Multipurpose Passenger Vehicle (MPV)		<input type="radio"/>		
<input type="checkbox"/> Low Speed Vehicle (LSV)		<input type="radio"/>		
<input type="checkbox"/> Incomplete Vehicle		<input type="radio"/>		
<input type="checkbox"/> Off Road Vehicle		<input type="radio"/>		
<input type="checkbox"/> Replica Motor Vehicle		<input type="radio"/>		

Equipment manufacturers and importers must select all equipment items produced or imported by their company. If the equipment item your company manufacture or import is not in the list of regulated equipment items, you may use the “*Other*” check box and enter the details of the item in the box provided below.

What Type of Regulated Equipment Does Your Company Manufacture? * Fill out this section only if you are an equipment manufacturer
Regulated equipment items are only the equipment items listed below that are subject to a Federal motor vehicle safety standard (check all that apply)

<input type="checkbox"/> Tires	<input type="checkbox"/> Rims	<input checked="" type="checkbox"/> Brake Hoses
<input type="checkbox"/> Brake Fluid	<input type="checkbox"/> Seat Belts	<input type="checkbox"/> Lamps, Reflectors and Assoc. Equipment
<input type="checkbox"/> CNG Containers	<input type="checkbox"/> Motorcycle Helmets	<input type="checkbox"/> Child Restraint Systems
<input type="checkbox"/> Platform Lifts	<input type="checkbox"/> Rear Impact Guards	<input checked="" type="checkbox"/> Triangular Warning Devices
<input checked="" type="checkbox"/> Glazing	<input type="checkbox"/> Retread	<input type="checkbox"/> Other (Motor vehicle equipment not covered by FMVSS)

In **Step 4**, upload any necessary documents that will benefit the submission (for example: company logos, agent certificates, etc.). If there are no relevant documents to submit, then this section can be skipped.

Domestic Manufacturers (49 CFR Part 566)

Step 1: Basic Manufacturer Information	Step 2: Additional Details	Step 3: Manufacturing Details	Step 4: Documents (Optional)	Step 5: Review and Confirmation
--	----------------------------	-------------------------------	-------------------------------------	---------------------------------

Here you can upload documents like logos, agent certificate or any other supporting document that may help with the submission. This step is optional.

Select File for Upload:

Document Type *

Title *

Click **Browse** to select a file for upload, select **Document Type** and enter its **Title**, then click **Upload Document** to copy the file to the server. Repeat those steps for every file you want to upload.

No files are uploaded yet!

Step 5 is to review and confirm that all information provided is correct to pursue the registration with NHTSA. Click the **Complete Submission** button to submit the application to NHTSA. You can cancel the submission by clicking the **Cancel Submission** button.

Supporting Documents [edit](#)

No files are uploaded yet.

You must ensure the accuracy of your submission. Any inaccuracy may result in a rejection of your submission or delay processing of your submission.

Once a complete application is submitted, a *Submission ID* will be assigned to that application and will be visible on the completion page on the portal. The user will receive an email from NHTSA to confirm the reception of the application. This email will have the *Submission ID* and a link to the submission.

The progress of a submission can be checked at anytime by entering the *Submission ID* into the Check Status box on the right side of the Manufacturer Portal home page. An email will be sent to the manufacturer to notify the acceptance or rejection of the submittal. To update an existing 566 record, please follow the instructions [here](#).

Check Status

If you already submitted a request and you want to check its status you can follow the link received in the confirmation email.

The same email contains a **Submission ID** and you can type (or copy/paste) it here:

Appendix 8 - How to enter Part 565 Submittal using NHTSA's Manufacturer Portal

Under 49 CFR 565.26, a motor vehicle manufacturer must submit to NHTSA, either directly or through an agent, information the agency will need to decipher the manufacturer's VIN characters not later than 60 days before the manufacturer offers for sale the first vehicle identified by that VIN or if information concerning vehicle characteristics sufficient to specify the VIN code is unavailable to the manufacturer by that date, then within one week after that information first becomes available. The VIN deciphering information can be submitted through the NHTSA Manufacturer Portal.

To start the Part 565 submission process through the Portal, select the *Document Type* on the *New Request* page. Document types can be seen in a drop-down list and once selected will allow the remainder of the fillable form to be completed. Fields marked with a red asterisk (*) are required fields.

Manufacturers must enter their *Company's Full Legal Name, Country, State, City, Business Email Address, and Submitter's Phone Number*.

Under the *Cover Letter/Submission Description* section, identify whether this is a new submission or an update to an existing record. If it is an update, you must identify all the changes from the existing record.

Type the captcha code and click the **Submit New Request** button to proceed to *Step 2*.

New Request

Here you can submit new form for VIN Requirements (49 CFR Part 565), Manufacturer Identification (49 CFR Part 566), Designation of U.S. Agent by Foreign Manufacturer (49 CFR Part 551, Subpart D), Equipment Plant Code Request (for Brake Hose, Glazing, New Tires, or Tire Retread), Adapted Vehicle Modifier Identification (49 CFR Part 595) or Replica Vehicle Registration (49 CFR Part 586), Replica Vehicles - Annual Report (49 CFR Part 586.12), Temporary Import Exemption Application for VEHICLES (Box 7 on the HS-7 Form) or Temporary Import Exemption Application for EQUIPMENT (Box 7 on the HS-7 Form)

You must ensure the accuracy of your submission. Any inaccuracy may result in a rejection of your submission or delay processing of your submission.

Fields marked with * are required.

Document Type * Vehicle Identification Number (VIN) Requirements (49 CFR Part 565 - VIN Dr

The OMB Control Number for this information collection is 2127-0510. You can view the Paperwork Reduction Act statement [here](#).

If you are already registered with NHTSA please enter your **Manufacturer ID** (you can find it in MID app). This will help you pre-populate forms with existing data.

- Please identify whether this submission is a new record or an update to an existing record.
- If this is an update, you **MUST** identify all changes from the existing record.

This is the first 565 submission for Paramount Industries.

Maximum 25,000 characters

Please type in text from the picture *

Check Status

If you already submitted a request and you want to check its status you can follow the link received in the confirmation email.

The same email contains a **Submission ID** and you can type (or copy/paste) it here:

On the top of the page is a guide that shows the progress of the submission as it is completed.

In *Step 2* of the submission process, the manufacturer can provide the following information:

- Indicate if it is a new VIN deciphering document or an update to a VIN deciphering document that is already submitted to NHTSA.
- Enter the Model Year From and To for which the VIN deciphering information is applicable to.
- Enter *Date Available to Public* if you want to keep the 565 submission confidential until a certain date. If a date is entered in this field, NHTSA will publish the 565 submission on [MID website](#) only on this date.
- First Name, Last Name, Position, and Business Phone Number of the person who submits the VIN deciphering document. (The Submitter's information fields are required fields).
- Complete the following fields only if the 565 submission is for a Replica Vehicle: Replica Motor Vehicle Make, Replica Motor Vehicle Model, Model year of the original replicated vehicle, and Model year of the replica.

Click on the **Save & Continue** button to save the information and proceed to the next step.

VIN Requirements (49 CFR Part 565)

Step 1: Basic Manufacturer Information	Step 2: Additional Details	Step 3: Upload Files (Mandatory)	Step 4: Review and Confirmation
---	-------------------------------	-------------------------------------	------------------------------------

PAPERWORK REDUCTION ACT STATEMENT: A federal agency may not conduct or sponsor, and a person is not required to respond to, nor shall a person be subject to a penalty for failure to comply with, a collection of information subject to the requirements of the Paperwork Reduction Act unless that collection of information displays a current valid OMB Control Number. The OMB Control Number for this information collection is 2127-0510 (Expiration Date: XX/XX/XX). This is a mandatory information collection that covers submissions of Vehicle Identification Number (VIN) deciphering information. Under 49 CFR Part 565, manufacturers of motor vehicles are required to submit to the National Highway Traffic Safety Administration (NHTSA) VIN-deciphering information whenever the manufacturer creates a new VIN-deciphering scheme or needs to update or otherwise make an amendment to a previously submitted VIN-deciphering scheme. NHTSA uses this information to identify the responsible manufacturer of vehicles that contain a safety-related defect or do not comply with an applicable Federal motor vehicle safety standard, as well as to determine production range, manufacturing plant, or relevant features to help determine the scope of a defect noncompliance. NHTSA estimates the burden associated with this submission to be 1 hour. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden to: Information Collection Clearance Officer, National Highway Traffic Safety Administration, 1200 New Jersey Ave, S.E., Room W45-205, Washington, DC, 20590.

Once a complete application is submitted, a *Submission ID* will be assigned to that application and will be visible on the completion page of the portal. The user will receive an email from NHTSA to confirm the reception of the application. This email will have the *Submission ID* and a link to the submission.

The progress of a submission can be checked at any time by entering the *Submission ID* into the *Check Status* box on the right side of the Manufacturer Portal home page. An email will be sent to the manufacturer to notify the acceptance or rejection of the submittal.

Check Status

If you already submitted a request and you want to check its status you can follow the link received in the confirmation email.

The same email contains a **Submission ID** and you can type (or copy/paste) it here:

[Check Status of Submitted Request](#)

Appendix 9 - How to enter Equipment Plant Submittals using NHTSA's Manufacturer Portal

Equipment plant code requests can be submitted through the Manufacturer Portal. A *New Tires Equipment Plant Code Request* is used here as an example. Other equipment plant code requests are similar enough to the *New Tires Equipment Plant Code Request*, that one example should serve for all. If there are any questions about other plant code requests, please contact the NHTSA Manufacturer Helpdesk at manufacturerinfo@dot.gov or 1-888-399-3277.

To start the equipment plant code submission process through the Portal, select the *Document Type* on the *New Request* page. Document types can be seen in a drop-down list and once selected will allow the remainder of the fillable form to be completed. Each field marked with a red asterisk (*) must be entered or the form will not allow the user to move forward.

Manufacturer Portal Powered by Version: TEST 3.15 last updated on 1/8/2022 [Release Notes](#) [Subscribe/Unsubscribe](#) [F.A.Q.](#)

New Request

Here you can submit new form for VIN Requirements (49 CFR Part 565), Manufacturer Identification (49 CFR Part 566), Designation of U.S. Agent for Foreign Manufacturer (49 CFR Part 551, Subpart D), Equipment Plant Code Request (for Brake Hose, Glazing, New Tires, or Tire Retread), Adapted Vehicle Modifier Identification (49 CFR Part 595) or Replica Vehicle Registration (49 CFR Part 586), Replica Vehicles - Annual Report (49 CFR Part 586.12), Temporary Import Exemption Application for VEHICLES (Box 7 on the HS-7 Form) or Temporary Import Exemption Application for EQUIPMENT (Box 7 on the HS-7 Form)

You must ensure the accuracy of your submission. Any inaccuracy may result in a rejection of your submission or delay processing of your submission.

Fields marked with * are required

Document Type * Application for New Tire Manufacturer Identification

If you are already registered with NHTSA please enter your **Manufacturer ID** (you can find it in MID app). This will help you pre-populate forms with existing data.

Once an application is submitted, a *Submission ID* will be assigned to that application and will be visible on the completion page on the portal. The user will receive an email from NHTSA to confirm the reception of the application. This email will have the *Submission ID* and a link to the submission.

The progress of a submission can be checked at anytime by entering the *Submission ID* into the *Check Status* box on the right side of the Manufacturer Portal home page. An email will be sent out to the manufacturer to notify the acceptance or rejection of the submittal.

Check Status

If you already submitted a request and you want to check its status you can follow the link received in confirmation email.

The same email contains a **Submission ID** and you can type (or copy/paste) it here:

Appendix 10 - How to update Existing Records (Part 566, Part 551, Part 565, Equipment Plant Codes, Part 586, and Replica Vehicle Annual Reporting) using the *Manufacturer ID*

The manufacturer portal allows the manufacturers to submit an update to their existing registration by using the *Manufacturer ID*. When this feature is used, the system pre-populates the application form with the existing registration details after verifying the identity of the manufacturer by using a *Verification Code*. The manufacturer can edit the information they want to update and submit the request.

Manufacturer ID is the unique ID generated by the vPIC system when a manufacturer is registered with NHTSA through the 49 CFR Part 566 process. Manufacturer ID can be found by searching the company details on [MID website](#). The Manufacturer ID feature is only available for Part 566, Part 551, Part 565, Equipment plant (Glazing, Brake Hose, New Tires, and Retread Tires), Part 586, and Replica Vehicle Annual Reporting submissions.

The manufacturer can start the submission process by selecting the *Document Type* from the dropdown and entering the *Manufacturer ID* in the box available on the *New Request* page. Click the **Submit** button.

New Request

Here you can submit new form for VIN Requirements (49 CFR Part 565), Manufacturer Identification (49 CFR Part 566), Designation of U.S. Agent by Foreign Manufacturer (49 CFR Part 551, Subpart D), Equipment Plant Code Request (for Brake Hose, Glazing, New Tires, or Tire Retread), Adapted Vehicle Modifier Identification (49 CFR Part 595) or Replica Vehicle Registration (49 CFR Part 586), Replica Vehicles - Annual Report (49 CFR Part 586.12), Temporary Import Exemption Application for VEHICLES (Box 7 on the HS-7 Form) or Temporary Import Exemption Application for EQUIPMENT (Box 7 on the HS-7 Form)

You must ensure the accuracy of your submission. Any inaccuracy may result in a rejection of your submission or delay processing of your submission.

PAPERWORK REDUCTION ACT STATEMENT: A federal agency may not conduct or sponsor, and a person is not required to respond to, nor shall a person be subject to a penalty for failure to comply with, a collection of information subject to the requirements of the Paperwork Reduction Act unless that collection of information displays a current valid OMB Control Number. The OMB Control Number for this information collection is 2127-0043 (Expiration Date: XXX/XXX/XX). This is a mandatory information collection that covers the submission of manufacturer identification information. Under 49 CFR Part 566, manufacturers of motor vehicles and certain items of motor vehicle equipment are required to submit identifying information to the National Highway Traffic Safety Administration (NHTSA) within 30 days of beginning manufacturing of motor vehicles or items of motor vehicle equipment subject to the Federal motor vehicle safety standards or 30 days prior to importing motor vehicles or items of motor vehicle equipment. The information is only submitted once unless the information in the original submission needs to be updated. NHTSA uses this information to contact manufacturers and also makes this information available to the general public on a NHTSA website. The purpose of this information collection is to ensure that NHTSA is able to identify manufacturers and their products and locate the manufacturer if a safety-related defect or noncompliance is suspected or found to exist in a motor vehicle or motor vehicle equipment. This ensures that NHTSA can administer and enforce recall of vehicles that do not comply with the FMVSS or contain safety-related defects. NHTSA estimates the burden associated with this submission to be 15 minutes. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden to: Information Collection Clearance Officer, National Highway Traffic Safety Administration, 1200 New Jersey Ave, S.E., Room W45-205, Washington, DC, 20590.

Appendix 11 - How to enter Replica Vehicle Registration Submittals using NHTSA's Manufacturer Portal

To register as a replica motor vehicle manufacturer:

- Domestic manufacturers must have submitted all information required by [49 CFR Part 566](#) to identify themselves to NHTSA as a motor vehicle manufacturer.
- Foreign manufacturers must have submitted all information required by [49 CFR Part 551](#) (Agent for service of process) and all information required to register under [49 CFR Part 566](#) to NHTSA.

Click [here](#) to see how to submit a 49 CFR Part 566 to NHTSA.

Refer to [49 CFR Part 586](#) for other replica motor vehicle manufacturer requirements.

To start the replica vehicle submission process through the Portal, select the *Document Type* on the *New Request* page. Document types can be seen in a drop-down list and once selected will allow the remainder of the fillable form to be completed. Fields marked with a red asterisk (*) are required fields.

The user must select the checkbox that says, "We certify that we are based in the United States and have submitted all information required to register with NHTSA under 49 CFR Part 566 **OR** we certify that as manufacturer based outside of the United States we have submitted all information required by 49 CFR Part 551 (Agent for service of process) and all information required to register under 49 CFR Part 566 to NHTSA." to move forward with the application.

Replica vehicle manufacturers based in the United States must enter the *Manufacturer ID*, in the box provided, to be able to proceed with the submission.

Replica vehicle manufacturers based outside of the United States can either use the *Manufacturer ID* feature to pre-populate the application or fill the application manually.

See the [Replica Vehicle Registration submission using Manufacturer ID \(Domestic and Foreign\)](#) section to find instructions on how to use the *Manufacturer ID* feature.

Continue with the following steps to complete the application.

In the *Cover Letter*, please identify whether the submission is a new record or an update to an existing record and provide a description of the application. Type the captcha code and click the **Submit New Request** button to proceed to *Step 2*. (See the screenshot below)

On the top of the page is a guide that shows the progress of the submission as it is completed.

In **Step 2** of the submission process, the manufacturer is required to provide the following information:

- Make, Model, Body Type, and Model Year of the original vehicle.
- Images of the front, rear and side views of the original vehicle.
- Measurements of the original and replicated vehicle.
- Design plan and/or original unaltered photos of the replica vehicle.
- A description of how the appearance of the replica vehicle will differ from that of the original vehicle.

Click the **Save this vehicle** button to save the information entered for each vehicle. The manufacturer must submit information about each make and model they manufacture.

Replica Vehicle Registration (49 CFR Part 586)

Step 1: Basic Replica Manufacturer Information	Step 2: Replica Vehicles	Step 3: Certification Details	Step 4: Review and Confirmation
---	-----------------------------	----------------------------------	------------------------------------

PAPERWORK REDUCTION ACT STATEMENT: A federal agency may not conduct or sponsor, and a person is not required to respond to, nor shall a person be subject to a penalty for failure to comply with, a collection of information subject to the requirements of the Paperwork Reduction Act unless that collection of information displays a current valid OMB Control Number. The OMB Control Number for this information collection is 2127-0746 (Expiration Date: XX/XX/XX). This information collection is for the collection of information necessary to register as a manufacturer of replica motor vehicles under 49 CFR 586. NHTSA will use the information submitted to determine whether to approve the registration. NHTSA estimates the burden associated with this submission to be 10 hours. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden to: Information Collection Clearance Officer, National Highway Traffic Safety Administration, 1200 New Jersey Ave, S.E., Room W45-205, Washington, DC, 20590.

NOTE: Verification code will be valid only for one hour!

When the manufacturer is verified by the vPIC system, the *Basic Replica Manufacturer Information* page will show up with the existing data pre-filled. All fields other than *Email* and *Cover Letter* will be disabled for data entry. Make changes as needed and click the **Save & Continue** button to proceed to *Step 2*. Click [here](#) to see the instructions for *Step 2*.

Replica Vehicle Registration (49 CFR Part 586)

Step 1: Basic Replica Manufacturer Information	Step 2: Replica Vehicles	Step 3: Certification Details	Step 4: Review and Confirmation
---	-----------------------------	----------------------------------	------------------------------------

PAPERWORK REDUCTION ACT STATEMENT: A federal agency may not conduct or sponsor, and a person is not required to respond to, nor shall a person be subject to a penalty for failure to comply with, a collection of information subject to the requirements of the Paperwork Reduction Act unless that collection of information displays a current valid OMB Control Number. The OMB Control Number for this information collection is 2127-0746 (Expiration Date: XX/XX/XX). This information collection is for the collection of information necessary to register as a manufacturer of replica motor vehicles under 49 CFR 586. NHTSA will use the information submitted to determine whether to approve the registration. NHTSA estimates the burden associated with this submission to be 10 hours. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden to: Information Collection Clearance Officer, National Highway Traffic Safety Administration, 1200 New Jersey Ave, S.E., Room W45-205, Washington, DC, 20590.

Save & Continue **Cancel Submission**

The progress of a Part 586 submission can be checked at anytime by entering the *Submission ID* into the *Check Status* box on the right side of the Manufacturer Portal home page. An email will be sent to the manufacturer to notify of any change in the application status.

Check Status

If you already submitted a request and you want to check its status you can follow the link received in confirmation email.

The same email contains a **Submission ID** and you can type (or copy/paste) it here:

Submission ID

Check Status of Submitted Request

A 586 submission can have the following status during the review process:

- **Under Review** - This is the default status set by the system when a 586 submission is received through the portal. The manufacturer will receive an email from NHTSA to confirm the reception of 586 application. The information provided will be reviewed by NHTSA's Office of Vehicle Safety Compliance (OVSC) to determine if any further information is required for NHTSA to make an official decision on the request.
- **Approved** - This status will be set when the 586 submission has been reviewed and approved by the OVSC. The manufacturer will be notified through email.
- **Rejected** - This status will be set when the 586 submission has been reviewed and rejected by the OVSC due to various reasons. The reason for rejection will be informed through email.
- **Incomplete** - This status will be set when the OVSC finds the application incomplete. The manufacturer will receive an email with a link to edit and re-submit the application. This link will be valid only for **60 days**. The reason for the "Incomplete" status will also be provided in the email.
- **Updated** - This status will be automatically set by the system when the manufacturer submits through the portal an update to a previously submitted 586 application that was marked with a status of "Incomplete" by the OVSC. A 586 submission will be marked as "Incomplete" only once. If the updated submission is also found incomplete, OVSC will be rejecting it.
- **Deemed Approved** – This status will be automatically set by the system if the 586 submission is not approved or rejected within 90 days of the submission.

Overnight Process

The status of the submission is changed automatically by an overnight process based on the duration of the submission.

- If a submission has a status of "Under Review" for more than **90 days**, the status will be changed to "Deemed Approved" by the overnight process.
- If a submission has a status of "Incomplete" for more than **60 days**, the status will be changed to "Rejected" by the overnight process.
- If a submission has a status of "Updated" for more than **30 days** (plus remaining days from the 90-day interval), the status will be changed to "Deemed Approved" by the overnight process.

Appendix 12 - How to enter Replica Vehicles - Annual Report Submittals using NHTSA's Manufacturer Portal

In addition to the *Replica Vehicle Registration* application, all replica vehicle manufacturers are required to submit annual reports to NHTSA as per [49 CFR Part 586.12](#). The annual reporting requirement would be essential to NHTSA's enforcement of the program, enabling the agency to better assess whether registrants are complying with the 325-vehicle limit and manufacturing vehicles qualifying as "replica motor vehicles."

To submit the *Replica Vehicle Annual Reporting*, the manufacturer is required to have a previously approved *Replica Vehicle Registration*.

To start the annual reporting submission process through the Portal, select the *Document Type* on the *New Request* page. Document types can be seen in a drop-down list and once selected will allow the remainder of the fillable form to be completed. Fields marked with a red asterisk (*) are required fields.

The manufacturer can proceed with the *Replica Vehicle Annual Reporting* submission only by entering the *Manufacturer ID*. Enter the *Manufacturer ID* on the *New Request* page and click the **Submit** button.

New Request

Here you can submit new form for VIN Requirements (49 CFR Part 565), Manufacturer Identification (49 CFR Part 566), Designation of U.S. Agent by Foreign Manufacturer (49 CFR Part 551, Subpart D), Equipment Plant Code Request (for Brake Hose, Glazing, New Tires, or Tire Retread), Adapted Vehicle Modifier Identification (49 CFR Part 595) or Replica Vehicle Registration (49 CFR Part 586), Replica Vehicles - Annual Report (49 CFR Part 586.12), Temporary Import Exemption Application for VEHICLES (Box 7 on the HS-7 Form) or Temporary Import Exemption Application for EQUIPMENT (Box 7 on the HS-7 Form)

You must ensure the accuracy of your submission. Any inaccuracy may result in a rejection of your submission or delay processing of your submission.

Fields marked with * are required

Document Type * Replica Vehicle Annual Reporting (49 CFR Part 586)

The OMB Control Number for this information collection is 2127-0746. You can view the Paperwork Reduction Act statement [here](#).

If you are already registered with NHTSA please enter your **Manufacturer ID** (you can find it in MID app). This will help you pre-populate forms with existing data.

Check Status

If you already submitted a request and you want to check its status you can follow the link received in the confirmation email.

The same email contains a **Submission ID** and you can type (or copy/paste) it here:

Submission ID

Once the *Manufacturer ID* is submitted, the identification screen will ask the manufacturer to select an email from the list of registered emails. The system will send the *Verification Code* to the selected email address.

Step 2 of 3 - Identification

Please select email address from the list below. To confirm your identity we will send a 'Verification code' to selected address.

Contact Email: **Replicavehicle@586.com**

Submitted Email: **MeganF@Worldwide.com**

[Send me verification code](#)

If you can not recognize any of the email addresses you probably entered wrong Manufacturer Id in previous step - please go back and try again!

If you recognize email address(es) but you don't have access to them anymore - you will need to [submit full application from the beginning](#), sorry.

The *Verification Code* received in the email must be entered in the box provided in *Step 3* and click the **Verify** button.

Manufacturer Portal Powered by  Version: STAGE 3.15 last updated on 1/8/2022 [Release Notes](#) [Subscribe/Unsubscribe](#) [F.A.Q.](#)

Step 3 of 3 - Verification

Verification code has been sent to selected email address - please enter it below and click on Verify button

NOTE: Verification code will be valid only for one hour!

[Verify](#)

When the manufacturer is verified by the vPIC system, the *Basic Replica Manufacturer Information* page will show up with the existing data pre-filled. All fields other than *Email* and *Cover Letter* will be disabled for data entry. Make changes as needed and click the **Save & Continue** button to proceed to *Step 2*.

Replica vehicle annual reporting (49 CFR Part 586)

Step 1: Basic Replica Manufacturer Information	Step 2: Annual Report Details	Step 3: Replica Vehicles	Step 4: Certification Details	Step 5: Review and Confirmation
---	---	------------------------------------	---	---

PAPERWORK REDUCTION ACT STATEMENT: A federal agency may not conduct or sponsor, and a person is not required to respond to, nor shall a person be subject to a penalty for failure to comply with, a collection of information subject to the requirements of the Paperwork Reduction Act unless that collection of information displays a current valid OMB Control Number. The OMB Control Number for this information collection is 2127-0746 (Expiration Date: XX/XX/XX). This is a mandatory information collection of annual reports from manufacturers of replica motor vehicles. Under 49 CFR Part 586, manufacturers of motor vehicle vehicles are required to submit annual reports to the National Highway Traffic Safety Administration (NHTSA). NHTSA will use the information submitted for enforcement purposes, enabling the agency to better assess whether registrants are complying with the 325-vehicle limit and manufacturing vehicles qualifying as "replica motor vehicles". The information will also be used by NHTSA to keep track of replica manufacturers that will continue producing replica motor vehicles under their existing registrations. NHTSA estimates the burden associated with submitting annual reports to be approximately 2 hours. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden to: Information Collection Clearance Officer, National Highway Traffic Safety Administration, 1200 New Jersey Ave, S.E., Room W45-205, Washington, DC, 20590.

Submission ID

Check Status of Submitted Request

In *SECTION 1: Vehicles*, the Importer is required to provide the following information:

- Contact information for official correspondence.
- Select the relevant application request option:
 - Select the first option if you are requesting new permission to import motor vehicles to the United States. The importer must provide information about the Broker.
 - Select the second option if you are only requesting to extend the expiration date of an existing permission. If other changes are also required, choose the third option to change existing import permission. For an extension request, the importer must upload the previous permission letter and specify the requested duration of the exemption.
 - Select the third option if you are adding or modifying operating locations, routes, vehicles, vehicle operations, expiration dates, or any other conditions established by a previous permission. For a change to existing import permission, there is no need to provide the broker information or upload the previous submission letter.
- Vehicle details: *Make, Model, Model year(s), GVWR, Vehicle Type*, and *VIN(s) or S/N(s)*. The importer must list all the VIN(s) or S/N(s) of the vehicles to be imported, in the box provided.

Any person knowingly making a false declaration in this application is subject to a fine of not more than \$10,000 or imprisonment for not more than 5 years or both (18 U.S.C. 1001).

On the top of the page is a guide that shows the progress of the submission as it is completed.

Click the **Save & Continue** button to save the information and continue to the next page.

Temporary Import Exemption Application for Vehicles

Vehicles	Vehicles ... continued	Vehicles Interacting with the Public	ADS-Equipped Vehicles	ADS-Equipped Vehicles Interacting with the Public	Other Information	Review and Confirmation
----------	------------------------	--------------------------------------	-----------------------	---	-------------------	-------------------------

PAPERWORK REDUCTION ACT STATEMENT: A federal agency may not conduct or sponsor, and a person is not required to respond to, nor shall a person be subject to a penalty for failure to comply with, a collection of information subject to the requirements of the Paperwork Reduction Act unless that collection of information displays a current valid OMB Control Number. The OMB Control Number for this information collection is 2127-0002. Expiration date: 9/30/2022. The information collected on this form is necessary to obtain a letter from NHTSA granting permission to temporarily import, for purposes of research, investigations, demonstrations or training, or competitive racing events, a motor vehicle or motor vehicle equipment that does not conform to all applicable Federal motor vehicle safety standards. The information is used to identify the vehicle or equipment to be imported and to verify that it is being imported for a permitted purpose. We estimate that it will take between 5 minutes and 10 hours to complete the form, depending on the intended use. The information collected is necessary to obtain an exemption under 49 U.S.C. 30114 and 49 CFR 591.5(j)(1) and 591.6(f)(1). Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden to: Information Collection Clearance Officer, National Highway Traffic Safety Administration, 1200 New Jersey Ave, S.E., Room W51-312, Washington, DC, 20590.

PRIVACY ACT OF 1974 COMPLIANCE INFORMATION: The following information is provided in accordance with 5 U.S.C. 522a(e)(3) and applies to this form. The information required on this form is required by 49 U.S.C. Chapters 301, 325 and 331. This information is used by the U.S. Department of Transportation, National Highway Traffic Safety Administration (NHTSA) to monitor the importation of motor vehicles and motor vehicle equipment to ensure compliance with Federal Motor Vehicle Safety Standards, Bumper Standards and Theft Prevention Standards. The records may be routinely used by the cited agencies, the Environmental Protection Agency, and State Divisions of Motor Vehicles. In instances of alleged fraud, records may be used by law enforcement agencies. Failure to provide the required information will result in the refusal of entry of the vehicle(s) or equipment into the United States.

Temporary Import Exemption Application for Vehicles

<input checked="" type="checkbox"/> Vehicles	Vehicles ... continued	Vehicles Interacting with the Public	ADS-Equipped Vehicles	ADS-Equipped Vehicles Interacting with the Public	Other Information	Review and Confirmation
--	------------------------	--------------------------------------	-----------------------	---	-------------------	-------------------------

* Indicates a required field

SECTION 1: Vehicles ... continued

If your response contains any material that you claim is confidential business information, it is essential that you follow the instructions in our confidential business information regulations described in 49 CFR Part 512

1.1 Purpose of Import *

- Research
- Demonstration
- Training
- Competitive Racing Event

Description of Use * - Brief description of the purpose for importation

The vehicle is exported for training and demonstration purpose only.

1.2 Location - Address and/or description of the location(s) where the Vehicle(s) will be operated or tested. List all states, separated by commas, where operation or testing will take place.

Location Description *

XYZ Industrial park

State(s) *

MD, PA and VA

1.3 Interaction with the Public

1.3.a. * Will the vehicle(s) be operated on public roads or outside of controlled laboratory/test track conditions at any time?

- Yes
- No

1.3.b. * Will the vehicle(s) be operated near members of the public¹ (e.g., pedestrians, bicyclists, motor vehicles) at any time?

- Yes
- No

1.3.c. * Will the vehicle(s) be involved in transporting members of the public¹ at any time?

- Yes
- No

1.4 * Automated Vehicle Technology

Will the vehicle(s) be operated by an Automated Driving Systems² (ADS) at any time?

- Yes
- No

1.5 * Disposition - Intended means of final disposition after completion of the purposes of importation

- Export
- Destroy Under CBP Supervision

1.6 * Requested Duration of Exemption in weeks from the date of permission

(permission may be extended beyond this duration with subsequent written permission from NHTSA)

20

¹ For purposes of this form, "members of the public" includes anyone that is not employed by (or is an agent of) the manufacturer, importer, or operator of the subject vehicle(s) or a regulating authority. To the extent an educational institution is included as an importer, or operator, "members of the public" includes students of the educational institution.

² Automated Driving System (ADS): The hardware and software that are collectively capable of performing the entire Dynamic Driving Task on a sustained basis, regardless of whether it is limited to a specific operational design domain. This term is used specifically to describe an SAE Level 3, 4, or 5 driving automation system (SAE J3016_JUN2018). For purposes of requesting permission to import a nonconforming vehicle under Box 7, SAE level classification is made regardless of the presence of a safety operator.

You will be given the opportunity to upload additional documents on the 'Other Information' page.

You will be given the opportunity to review and edit all sections on the 'Review and Confirmation' page before submitting your application.

[Save & Continue](#)

[Cancel Submission](#)

If you answered “Yes” to any of the questions in the *1.3 Interaction with the Public* segment, complete *SECTION 2: Vehicles Interacting with the Public*. If not, proceed to [SECTION 3: ADS-Equipped Vehicles](#).

In *SECTION 2: Vehicles Interacting with the Public*, the importer is required to provide the following information:

- **(2.1) Noncompliance with Specific FMVSS:** Various Federal Motor Vehicle Safety Standard (FMVSS) standards will be listed here based on the *Vehicle Type* selection from *Section 1: Vehicles*. In the screenshot below, the *Vehicle Type* selected is “Low Speed Vehicle” and therefore only the FMVSS standards applicable to LSV vehicles are listed.
For each standard listed, the importer must indicate if the vehicle meets the requirements.
 - Select “Yes” if the vehicle meets the requirement.
 - Select “No” or “Unknown” if the vehicle does not meet the requirement. Describe the potential noncompliance and explain how any risks resulting from the potential noncompliance will be mitigated. If the mitigation includes compliance with standards other than the FMVSS, identify each such standard and explain how the vehicle’s conformity to the other standard compares to compliance with the corresponding FMVSS provision.
 - Select “Not Applicable” if you believe that FMVSS does not apply and explain the reason for it.
- **(2.2) Insurance:** Indicate whether you maintain insurance coverage from a regulated insurance company at all times in a sufficient amount to cover liability for damages, including for bodily injury or death, that may result from the operation of the vehicle in the manner and location(s) described in the application.
- **(2.3) Photographs:** Provide interior and exterior photos of the vehicle. If importing multiple identical vehicles, you may provide photos of a single vehicle that are representative of the group.
- **(2.4) Mileage:** Specify the estimated total number of miles to be driven while interacting with the public.
- **(2.5) Operator Information:** Provide the contact information for the entity that employs the safety operator(s) or driver(s). If the operator information is same as the importer, there is an option to auto-fill the operator information. Click the link that says, “Click here if you want to copy Importer's data”.

Click the **Save & Continue** button to save the information and continue to the next page.

SECTION 2: Vehicles Interacting with the Public

If your response contains any material that you claim is confidential business information, it is essential that you follow the instructions in our confidential business information regulations described in [49 CFR Part 512](#)

2.1 Noncompliance with Specific FMVSS

For each Federal Motor Vehicle Safety Standard (FMVSS) listed below, indicate if the vehicle meets the requirements.

- If you select **Yes**, you are indicating that the vehicle meets all requirements for that FMVSS.
- If you select **No** or **Unknown**, describe the potential noncompliance and explain how any risks resulting from the potential noncompliance will be mitigated. If the mitigation includes compliance with standards other than the FMVSS, identify each such standard and explain how the vehicle's conformity to the other standard compares to compliance with the corresponding FMVSS provision.
- If you select **Not Applicable**, explain why you believe that FMVSS does not apply.

FMVSS	Meets the Requirements? *	Description/Explanation	Mitigation
141 - Minimum Sound Requirements for Hybrid and Electric Vehicles <small>This standard only applies to hybrid and electric vehicles. See FMVSS No. 141 S9 for phase-in schedule.</small>	<input checked="" type="radio"/> Yes <input type="radio"/> No <input type="radio"/> Unknown <input type="radio"/> Not applicable		
205 - Glazing Materials	<input checked="" type="radio"/> Yes <input type="radio"/> No <input type="radio"/> Unknown <input type="radio"/> Not applicable		
500 - Low-Speed Vehicles	<input type="radio"/> Yes <input type="radio"/> No <input type="radio"/> Unknown <input checked="" type="radio"/> Not applicable	The FMVSS does not apply to Low speed vehicles.	

2.2 Insurance *

Will you maintain insurance coverage from a regulated insurance company at all times in a sufficient amount to cover liability for damages, including for bodily injury or death, that may result from the operation of the vehicle in the manner and location(s) described in this application?

- Yes
 No

2.3 Photographs *

Provide interior and exterior photos of the vehicle. If importing multiple identical vehicles, you may provide photos of a single vehicle that are representative of the group.

<p>Interior</p> <p>Add file(s)</p> <p>Delete Interior 1.jpg</p> <p>Delete Interior 2.jpg</p>	<p>Exterior</p> <p>Add file(s)</p> <p>Delete Exterior 1.jpg</p> <p>Delete Exterior 2.jpg</p>
--	--

2.4 Mileage *

Estimated total number of miles to be driven while interacting with the public:

2.5 Operator Information

Provide contact information for the entity that employs the safety operator(s) or driver(s). [Click here if you want to copy Importer's data](#)

<p>Name *</p> <input type="text" value="George Smith"/>	<p>Country *</p> <input type="text" value="UNITED STATES (USA)"/>

<p>Phone *</p> <input type="text" value="8889990000"/>	<p>Zip/Postal code *</p> <input type="text" value="12345"/>

You will be given the opportunity to upload additional documents on the 'Other Information' page. You will be given the opportunity to review and edit all sections on the 'Review and Confirmation' page before submitting your application.

[Save & Continue](#)
[Cancel Submission](#)

If you answered “Yes” to question 1.4 *Automated Vehicle Technology*, complete **SECTION 3: ADS-Equipped Vehicles**. If not, proceed to [SECTION 4: ADS-Equipped Vehicles Interacting with the Public](#)

In **SECTION 3: ADS-Equipped Vehicles**, the importer is required to describe the following:

- **3.1** Hardware or software changes made to the vehicle model or its ADS since its most recently granted permission.
- **3.2** Vehicle’s Operational Design Domain
- **3.3** The extent to which this ADS or a substantially similar ADS has been previously tested using this vehicle model or another vehicle model
- **3.4** Maximum SAE Automation Level
- **3.5** The engineering development process employed by the vehicle’s manufacturer.
- **3.6** The nature of any testing that will be performed on the vehicles.

If the answer to all questions in 1.3 *Interaction with the Public* segment were “No”, question 3.6 will be hidden.

SECTION 3: ADS-Equipped Vehicles

ADS-Equipped Vehicles Information

 If your response contains any material that you claim is confidential business information, it is essential that you follow the instructions in our confidential business information regulations described in [49 CFR Part 512](#)

Is this your first application with this vehicle? *

- Yes
 No

3.1 * Describe any hardware or software changes to the vehicle model or its Automated Driving System (ADS) since its most recently granted permission.

Not applicable

3.2 * Briefly discuss the vehicle’s Operational Design Domain (e.g. maximum speed, road type, geographical, time-of-day restrictions, etc.) include any weather (temperature, snow, rain, fog, hail, high winds, cloud cover, etc.) or other environmental conditions that may affect the performance of the vehicle’s ADS.

40 Mph, None

3.3 * Describe the extent to which this ADS or a substantially similar ADS (e.g. prior/newer generation) has been previously tested using this vehicle model or another vehicle model. List any incidents resulting in deaths or injuries and any incidents occurring within the last 5 years on public roads resulting in property damage.

None

3.4 * What will be the maximum SAE Automation Level of the vehicle as operated?

- SAE Level 3
 SAE Level 4
 SAE Level 5

3.5 * Describe, to the extent you are aware, the engineering development process employed by the vehicle’s manufacturer including any processes/certifications related to quality management, design and development, and/or risk management (e.g. ISO/TS 16949, ISO 9001, ISO 26262, etc.)?

Engineering development description text.

If you answered “Yes” to any of the questions in *1.3 Interaction with the Public* segment and “Yes” to question *1.4 Automated Vehicle Technology*, complete *SECTION 4: ADS-Equipped Vehicles Interacting with the Public*. If not, proceed to [Other Information](#) page.

In *SECTION 4: ADS-Equipped Vehicles Interacting with the Public*, the importer is required to describe the following:

- **4.1** The proposed operation of the vehicle, including any research, demonstration, training, or investigation objectives and identify all entities involved with the project.
- **4.2** The location where the operation(s) will be performed, including addresses of starting point(s) and any stops, as applicable. State the length of all routes in miles. In addition, upload a map or aerial view of all location(s) and/or anticipated route(s) with all roads clearly marked. (.kml and Google Earth files are preferred).
- **4.3** The degree of anticipated public integration during operation. State the vehicle’s maximum operating speed(s), the posted speed limit(s) on all roads where the vehicle will travel and the anticipated times of day the vehicle will be operated.
- **4.4** Any public outreach performed in preparation of the operation and the response from the community.
- **4.5** Indicate whether the vehicle is equipped with seat belts at all seating positions.
- **4.6** Indicate whether the operation of vehicle(s) involve only seated occupants.
- **4.7** The architecture of vehicle’s braking system, the maximum deceleration rate that the ADS can apply while braking and the minimum stopping distance that the ADS can achieve while braking from its maximum operating speed.
- **4.8** Predetermined points during operation where the safety operator will assume control or provide input to the vehicle’s operation.
- **4.9** The plan to limit the operation of the vehicle and ADS to its Operational Design Domain.
- **4.10** Indicate whether you anticipate updating the software or hardware of the vehicle at any time during the requested operational period and if so, explain the changes.
- **4.11** All local or state government authorizations required to test the vehicle in autonomous mode on public roads.
- **4.12** Where the vehicle(s) will be stored when not in operation, the distance between storage and the operating location(s) and how the vehicle will be transported to and from storage.
- **4.13** Indicate whether the vehicle will be operated in any school zones or near other areas where children congregate at any time.
- **4.14** Indicate whether a trained safety operator be in the vehicle(s) at all times during operation.
- **4.15** Indicate whether a trained safety operator be able to take immediate control of the vehicle should the need arise and if yes, explain the process. How the ADS is engaged/disengaged and what controls are used during manual operation.
- **4.16** The training program specifically how operators are selected, trained, monitored and corrective actions are enforced. If your training program references any industry best practices, provide the document reference.
- **4.17** The topics covered in training.
- **4.18** Indicate whether the safety operators are provided with the information of the vehicle as part of the training.
- **4.19** Indicate whether the safety operators are required to pass a written evaluation or skills assessment.
- **4.20** Indicate whether a supervised operation is conducted prior to permitting operation alone.
- **4.21** Indicate whether periodic monitoring, evaluation, or training are conducted following the initial training.
- **4.22** Indicate whether the safety operators use pre-tip checklists.
- **4.23** The policies regarding mandatory breaks and for limiting safety operator distraction.
- **4.24** Incident response protocols.

[Delete](#) [Sample1.jpg](#)

4.3 * Describe the degree of anticipated public interaction during operation. State the vehicle's maximum operating speed(s), the posted speed limit(s) on all roads where the vehicle will travel or cross, and the anticipated times of day the vehicle will be operated.

Description text

4.4 * Describe any public outreach you have performed in preparation of this operation. Describe the response from the community.

Description text

4.5 * Is the vehicle equipped with seat belts at all seating positions?

- Yes
 No

4.6 * Will operation of the vehicle(s) involve only seated occupants?

- Yes
 No
 Unknown

4.7 * Braking Systems

a) Describe the vehicle's braking system architecture, including any redundant or backup systems.

Description text

b) State the maximum deceleration rate that the ADS can apply while braking

Description text

c) State the minimum stopping distance that the ADS can achieve while braking from its maximum operating speed

Description text

4.8 * List and describe any predetermined points during operation where the safety operator will assume control or provide input to the vehicle's operation.

Description text

4.9 * How do you plan to limit the operation of the vehicle and ADS to its Operational Design Domain (e.g. maximum speed, road type, weather, etc.) [described in response to Question 3.2](#)

Description text

4.10 * Do you anticipate updating the software or hardware of the vehicle at any time during the requested operational period? If so, explain.

Description text

4.11 * List all local or state government authorizations required to test the vehicle in autonomous mode on public roads. Note any required authorizations not yet obtained. If local or state government authorization is not required, so state.

Description text

Add file(s)

Delete Sample2.jpg

4.12 * Discuss vehicle storage. Include where the vehicle(s) will be stored when not in operation, the distance between storage and the operating location(s), and how the vehicle(s) will be transported to and from storage.

Description text

4.13 * Will the vehicle(s) be operated in any school zones or near other areas where children congregate at any time?

- Yes
 No

Safety Operator Training

4.14 * Will a trained safety operator be in the vehicle(s) at all times during operation?

- Yes
 No

4.15 * Will a trained safety operator be able to take immediate control of the vehicle should the need arise? If so, describe this process. Include detailed descriptions of how the ADS is engaged/disengaged and what controls are used during manual operation.

Description text

4.16 * Describe your training program, specifically how operators are selected, trained, monitored, and corrective actions are enforced. If your training program references any industry best practices, provide the document reference .

Description text

4.17 * What topics are covered in training?

Description text

4.18 * Are safety operators provided with information on the limitations of the vehicle as part of the training or otherwise?

Description text

4.19 * Are safety operators required to pass a written evaluation or skills assessment? If so, describe.

Description text

4.20 * Is supervised operation conducted prior to permitting operation alone? If so, describe.

Description text

4.21 * Is periodic monitoring, evaluation, or training conducted following initial training? If so, describe.

Description text

4.22 * Do safety operators use pre-trip checklists? If so, describe.

Description text

4.23 * Briefly describe your policies regarding mandatory breaks and for limiting safety operator distraction.

Description text

4.24 * Describe your incident response protocols.

Email	GeorgeS@Paramount.com	State / Province	FLORIDA
Phone	8889990000	ZIP / Postal Code	12345

This application is [A new permission](#) to import motor vehicles into the United States.

Broker Information

Name	Madison Park	Email	ABCMarketing@BOX7.com
Company Name	ABC marketing	Phone	1112223434
Filer Code	ABC500		

Vehicle Information

Make	Master cars
Model	TXT 500
Model year(s)	2022 to 2025
GVWR	1000 kg
Vehicle Type	Low Speed Vehicle (LSV)
VIN(s) or S/N(s)	SAMPLEVIN11111111 SAMPLEVIN22222222 SAMPLEVIN33333333 SAMPLEVIN44444444

SECTION 1: Vehicles ... continued [Edit](#)

1.1 Purpose of Import Research
Demonstration
Training

Description of Use The vehicle is exported for training and demonstration purpose only.

1.2 Location - Address and/or description of the location(s) where the Vehicle(s) will be operated or tested. List all states, separated by commas, where operation or testing will take place.

Location Description XYZ Industrial park
State(s) MD,PA and VA

1.3 Interaction with the Public

a.Will the vehicle(s) be operated on public roads or outside of controlled laboratory/test track conditions at any time?

Yes

b.Will the vehicle(s) be operated near members of the public (e.g., pedestrians, bicyclists, motor vehicles) at any time?

No

c.Will the vehicle(s) be involved in the transporting members of the public at any time?

Yes

1.4 Automated Vehicle Technology

Will the vehicle(s) be operated by an Automated Driving Systems (ADS) at any time?

Yes

1.5 Disposition - Intended means of final disposition after completion of the purposes of importation

Destroy Under CBP Supervision

1.6 Requested Duration of Exemption: 20 in weeks from the date of permission
(permission may be extended beyond this duration with subsequent written permission from NHTSA)

SECTION 2: Vehicles Interacting with the Public [Edit](#)

2.1 Non-compliance with Specific FMVSS

For each Federal Motor Vehicle Safety Standard (FMVSS) listed below, indicate if the vehicle meets the requirements.

- If you select **Yes**, you are indicating that the vehicle meets all requirements for that FMVSS.
- If you select **No** or **Unknown**, describe the potential noncompliance and explain how any risks resulting from the potential noncompliance will be mitigated. If the mitigation includes compliance with standards other than the FMVSS, identify each such standard and explain how the vehicle's conformity to the other standard compares to compliance with the corresponding FMVSS provision.
- If you select **Not Applicable**, explain why you believe that FMVSS does not apply.

FMVSS	Meets the Requirements?	Description/Explanation	Mitigation
141 - Minimum Sound Requirements for Hybrid and Electric Vehicles	Yes		
205 - Glazing Materials	Yes		
500 - Low-Speed Vehicles	Not Applicable	The FMVSS does not apply to Low speed vehicles.	

2.2 Insurance

Do you have insurance coverage from a regulated insurance company in a sufficient amount to cover liability for damages, including for bodily injury or death, resulting from the operation of the vehicle in the manner and location(s) described in this application?

Yes

2.3 Photographs

Provide interior and exterior photos of the vehicle. If importing multiple identical vehicles, you may provide photos of a single vehicle that are representative of the group.

Interior	Exterior
Interior 1.jpg	Exterior 1.jpg
Interior 2.jpg	Exterior 2.jpg

2.4 Mileage

Estimated total number of miles to be driven while interacting with the public:

50

2.5 Operator Information

Provide contact information for the entity that employs the safety operator(s) or driver(s).

Name	George Smith	Country	UNITED STATES (USA)
Title	Vice President	Address	123 Main Street
Company Name	paramount Companies	City	Lancaster
Email	GeorgeS@Paramount.com	State	FLORIDA
Phone	8889990000	Zip/Postal code	12345

SECTION 3: ADS-Equipped Vehicles

[Edit](#)ADS-Equipped Vehicles Information

Is this your first application with this vehicle? Yes

3.1 Describe any hardware or software changes to the vehicle model or its Automated Driving System (ADS) since its most recently granted permission.

Not applicable

3.2 Briefly discuss the vehicle's Operational Design Domain (e.g. maximum speed, road type, geographical, time-of-day restrictions, etc.) include any weather (temperature, snow, rain, fog, hail, high winds, cloud cover, etc.) or other environmental conditions that may affect the performance of the vehicle's ADS.

40 Mph, None

3.3 Describe the extent to which this ADS or a substantially similar ADS (e.g. prior/newer generation) has been previously tested using this vehicle model or another vehicle model. List any incidents resulting in deaths or injuries and any incidents occurring within the last 5 years on public roads resulting in property damage.

None

3.4 What will be the maximum SAE Automation Level of the vehicle as operated?

SAE Level 3

3.5 Describe, to the extent you are aware, the engineering development process employed by the vehicle's manufacturer including any processes/certifications related to quality management, design and development, and/or risk management (e.g. ISO/TS 16949, ISO 9001, ISO 26262, etc.)?

Engineering development description text.

SECTION 4: ADS-Equipped Vehicles Interacting with the Public

[Edit](#)ADS-Equipped Vehicle Operation

4.1 Provide a detailed description of your proposed operation, including any research, demonstration, training, or investigation objectives you may have. Identify all entities involved with this project.

Description text

4.2 State precisely where the operation(s) will be performed, including addresses of starting point(s) and any stops, as applicable. State the length of all routes in miles.

Description text

Provide a map or aerial view of all location(s) and/or anticipated route(s). Ensure that all roads are clearly labeled, as applicable. (.kmz and Google Earth files are preferred)

[Sample1.jpg](#)

4.3 Describe the degree of anticipated public interaction during operation. State the vehicle's maximum operating speed(s), the posted speed limit(s) on all roads where the vehicle will travel or cross, and the anticipated times of day the vehicle will be operated.

Description text

4.4 Describe any public outreach you have performed in preparation of this operation. Describe the response from the community.

Description text

4.5 Is the vehicle equipped with seat belts at all seating positions?

Yes

4.6 Will operation of the vehicle(s) involve only seated occupants?

Yes

4.7 a) Describe the vehicle's braking system architecture, including any redundant or backup systems.

Description text

4.7 b) State the maximum deceleration rate that the ADS can apply while braking

Description text

4.7 c) State the minimum stopping distance that the ADS can achieve while braking from its maximum operating speed

Description text

4.8 List and describe any predetermined points during operation where the safety operator will assume control or provide input to the vehicle's operation.

Description text

4.9 How do you plan to limit the operation of the vehicle and ADS to its Operational Design Domain (e.g. maximum speed, road type, weather, etc.) described in response to Question 3.2?

Description text

4.10 Do you anticipate updating the software or hardware of the vehicle at any time during the requested operational period? If so, explain.

Description text

4.11 List all local or state government authorizations required to test the vehicle in autonomous mode on public roads. Note any required authorizations not yet obtained. If local or state government authorization is not required, so state.

Description text

[Sample2.jpg](#)

4.12 Discuss vehicle storage. Include where the vehicle(s) will be stored when not in operation, the distance between storage and the operating location(s), and how the vehicle(s) will be transported to and from storage.

Description text

4.13 Will the vehicle(s) be operated in any school zones or near other areas where children congregate at any time?

No

Safety Operator Training

4.14 Will a trained safety operator be in the vehicle(s) at all times during operation?

Yes

4.15 Will a trained safety operator be able to take immediate control of the vehicle should the need arise? If so, describe this process. Include detailed descriptions of how the ADS is engaged/disengaged and what controls are used during manual operation.

Description text

4.16 Describe your training program, specifically how operators are selected, trained, monitored, and corrective actions are enforced. If your training program references any industry best practices, provide the document reference.

Description text

4.17 What topics are covered in training?

Description text

4.18 Are safety operators provided with information on the limitations of the vehicle as part of the training or otherwise?

Description text

4.19 Are safety operators required to pass a written evaluation or skills assessment? If so, describe.

Description text

4.20 Is supervised operation conducted prior to permitting operation alone? If so, describe.

Description text

4.21 Is periodic monitoring, evaluation, or training conducted following initial training? If so, describe.

Description text

4.22 Do safety operators use pre-trip checklists? If so, describe.

Description text

4.23 Briefly describe your policies regarding mandatory breaks and for limiting safety operator distraction.

Description text

4.24 Describe your incident response protocols.

Other Information [Edit](#)

Provide any additional information that may be useful (optional).

Provide additional documents, if needed (optional).

[Paramount Companies.pdf](#)

You must ensure the accuracy of your submission. Any inaccuracy may result in a rejection of your submission or delay processing of your submission.

Any person knowingly making a false declaration is subject to a fine of not more than \$10,000 or imprisonment for not more than 5 years or both (18 U.S.C. 1001).

[Submit](#)

[Cancel Submission](#)

Once an application is submitted, a *Submission ID* will be assigned to that application and will be visible on the completion page on the portal. The manufacturer will receive an email from NHTSA to confirm the reception of the application. This email will have the *Submission ID* and a link to the submission.

The progress of a *Temporary Import Exemption Application for Vehicles* submission can be checked at any time by entering the *Submission ID* into the *Check Status* box on the right side of the Manufacturer Portal home page.

Check Status

If you already submitted a request and you want to check its status you can follow the link received in confirmation email.

The same email contains a **Submission ID** and you can type (or copy/paste) it here:

For any questions or concerns about the content of your application or the temporary import exemption process, please email Box7Imports@dot.gov.

Appendix 14 – How to Enter Temporary Import Exemption for EQUIPMENT submittals Using NHTSA’s Manufacturer Portal

Temporary Import Exemption Application for EQUIPMENT (Box 7 on the HS-7)

To start the *Temporary Import Exemption for EQUIPMENT* application process through the Portal, select the *Document Type* on the *New Request* page. Document types can be seen in a drop-down list and once selected will allow the remainder of the fillable form to be completed. Fields marked with a red asterisk (*) are required fields.

Before you start filling out the form, the importers are advised to download the checklist from the link provided on the *New Request* page and prepare all the documents and data.

In the *Cover Letter*, please identify whether the submission is a new record or an update to an existing record and provide a description of the application. Type the captcha code and click the **Submit New Request** button to proceed to the next step.

Manufacturer Portal Powered by Version: TEST 3.15 last updated on 1/8/2022 [Release Notes](#) [Subscribe/Unsubscribe](#) [FAQ](#)

New Request

Here you can submit new form for VIN Requirements (49 CFR Part 565), Manufacturer Identification (49 CFR Part 566), Designation of U.S. Agent by Foreign Manufacturer (49 CFR Part 551, Subpart D), Equipment Plant Code Request (for Brake Hose, Glazing, New Tires, or Tire Retread), Adapted Vehicle Modifier Identification (49 CFR Part 595) or Replica Vehicle Registration (49 CFR Part 586), Replica Vehicles - Annual Report (49 CFR Part 586.12), Temporary Import Exemption Application for VEHICLES (Box 7 on the HS-7 Form) or Temporary Import Exemption Application for EQUIPMENT (Box 7 on the HS-7 Form)

You must ensure the accuracy of your submission. Any inaccuracy may result in a rejection of your submission or delay processing of your submission.

Fields marked with * are required

Document Type * Temporary Import Exemption Application for EQUIPMENT (Box 7 on the HS-7) ▼

The OMB Control Number for this information collection is 2127-0002. You can view the Paperwork Reduction Act statement [here](#).

Before you start with the form please download this checklist and prepare all the documents and data.

Cover Letter / Submission Description *

- Please identify whether this submission is a new record or an update to an existing record.
- If this is an update, you **MUST** identify all changes from the existing record.

Dear Sir/Madam,
This is a new submission from Paramount companies.
Thanks,
George Smith

Check Status

If you already submitted a request and you want to check its status you can follow the link received in the confirmation email.

The same email contains a Submission ID and you can type (or copy/paste) it here:

Check Status of Submitted Request

In *SECTION 1: Equipment*, the Importer is required to provide the following information:

- Contact information for official correspondence.
- Select the relevant application request option:
 - Select the first option if you are requesting a new permission to import motor vehicles to the United States. The importer must provide information about the Broker.
 - Select the second option if you are only requesting to extend the expiration date of existing permission. If other changes are also required, choose the third option to change existing import permission. For an extension request, the importer must upload the previous permission letter and specify the requested duration of exemption.
 - Select the third option if you are adding or modifying operating locations, routes, vehicles, vehicle operations, expiration dates, or any other conditions established by a previous permission. For a change to existing import permission, there is no need to provide the broker information or upload the previous submission letter.
- Equipment details: *Equipment Type, Total Quantity, Make/Brand, Model, TIN or S/N, Manufacture Year, and Manufacture Month.*

Any person knowingly making a false declaration in this application is subject to a fine of not more than \$10,000 or imprisonment for not more than 5 years or both (18 U.S.C. 1001).

On the top of the page is a guide that shows the progress of the submission as it is completed.

Click the **Save & Continue** button to save the information and continue to the next page.

Temporary Import Exemption Application for Equipment

Equipment	Equipment ... continued	Equipment Interacting with the Public	Other Information	Review and Confirmation
-----------	-------------------------	---------------------------------------	-------------------	-------------------------

PAPERWORK REDUCTION ACT STATEMENT: A federal agency may not conduct or sponsor, and a person is not required to respond to, nor shall a person be subject to a penalty for failure to comply with, a collection of information subject to the requirements of the Paperwork Reduction Act unless that collection of information displays a current valid OMB Control Number. The OMB Control Number for this information collection is 2127-0002. Expiration date: 9/30/2022. The information collected on this form is necessary to obtain a letter from NHTSA granting permission to temporarily import, for purposes of research, investigations, demonstrations or training, or competitive racing events, a motor vehicle or motor vehicle equipment that does not conform to all applicable Federal motor vehicle safety standards. The information is used to identify the vehicle or equipment to be imported and to verify that it is being imported for a permitted purpose. We estimate that it will take between 5 minutes and 10 hours to complete the form, depending on the intended use. The information collected is necessary to obtain an exemption under 49 U.S.C. 30114 and 49 CFR 591.5(j)(1) and 591.6(f)(1). Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden to: Information Collection Clearance Officer, National Highway Traffic Safety Administration, 1200 New Jersey Ave, S.E., Room W51-312, Washington, DC, 20590.

PRIVACY ACT OF 1974 COMPLIANCE INFORMATION: The following information is provided in accordance with 5 U.S.C. 522a(e)(3) and applies to this form. The information required on this form is required by 49 U.S.C. Chapters 301, 325 and 331. This information is used by the U.S. Department of Transportation, National Highway Traffic Safety Administration (NHTSA) to monitor the importation of motor vehicles and motor vehicle equipment to ensure compliance with Federal Motor Vehicle Safety Standards, Bumper Standards and Theft Prevention Standards. The records may be routinely used by the cited agencies, the Environmental Protection Agency, and State Divisions of Motor Vehicles. In instances of alleged fraud, records may be used by law enforcement agencies. Failure to provide the required information will result in the refusal of entry of the vehicle(s) or equipment into the United States.

SECTION 1: Equipment ... continued

If your response contains any material that you claim is confidential business information, it is essential that you follow the instructions in our confidential business information regulations described in [49 CFR Part 512](#)

1.1 Purpose of Exemption: *

- Research
- Investigation
- Demonstration
- Training
- Competitive Racing Event

1.2 Description of Use * - Describe how the vehicle will be used and include reasons for why public road use is necessary.

The equipment is exported for demonstration purposes only.

1.3 Location - Address and/or description of the location(s) where the Equipment will be used or tested. List all states, separated by commas, where operation or testing will take place.

Location Description *

Parsons Factory industrial area

State(s) *

CA,Az

1.4 Interaction with the Public

1.4.a. * Will the equipment be used on public roads or outside of controlled laboratory/test track conditions at any time?

- Yes
- No

1.4.b. * Will the equipment be used near members of the public ¹ (e.g., pedestrians, motor vehicle(s)) at any time?

- Yes
- No

1.4.c. * Will the equipment be involved in transporting members of the public ¹ at any time?

- Yes
- No

1.5 *Disposition - Intended means of final disposition after completion of the purposes of importation

- Export
- Destroy Under CBP Supervision

1.6 *Requested Duration of Exemption in weeks from the date of permission

(permission may be extended beyond this duration with subsequent written permission from NHTSA)

30

You will be given the opportunity to upload additional documents on the 'Other Information' page.

You will be given the opportunity to review and edit all sections on the 'Review and Confirmation' page before submitting your application.

¹ For purposes of this form, "members of the public" includes anyone that is not employed by (or is an agent of) the manufacturer, importer, or operator of the subject vehicle(s) or a regulating authority. To the extent an educational institution is included as an importer, or operator, "members of the public" includes students of the educational institution.

Click the **Save & Continue** button to save the information and continue to the next page.

If you answered “Yes” to any of the questions in the *1.4 Interaction with the Public* segment, complete **SECTION 2: Equipment Interacting with the Public**. If not, proceed to [Other Information](#) page.

In **SECTION 2: Equipment Interacting with the Public**, the importer is required to provide the following information:

- **(2.1) Noncompliance with Specific FMVSS:** Various Federal Motor Vehicle Safety Standard (FMVSS) standards will be listed here based on the *Equipment Type* selection from *Section 1: Equipment*. For each standard listed, the importer must indicate if the vehicle meets the requirements.
 - Select “Yes” if the vehicle meets the requirement.
 - Select “No” or “Unknown” if the vehicle does not meet the requirement. Describe the potential noncompliance and explain how any risks resulting from the potential noncompliance will be mitigated. If the mitigation includes compliance with standards other than the FMVSS, identify each such standard and explain how the vehicle’s conformity to the other standard compares to compliance with the corresponding FMVSS provision.
 - Select “Not Applicable” if you believe that FMVSS does not apply and explain the reason for it.
- **(2.2) Insurance:** Indicate whether you maintain insurance coverage from a regulated insurance company at all times in a sufficient amount to cover liability for damages, including for bodily injury or death, that may result from the operation of the vehicle in the manner and location(s) described in the application.
- **(2.3) Photographs:** Provide photos of the equipment. If importing multiple items of equipment, provide photos of a single item of equipment that are representative of the group.

SECTION 2: Equipment Interacting with the Public

If your response contains any material that you claim is confidential business information, it is essential that you follow the instructions in our confidential business information regulations described in [49 CFR Part 512](#)

2.1 Non-compliance with Specific FMVSS

For each Federal Motor Vehicle Safety Standard (FMVSS) listed below, indicate if the vehicle meets the requirements.

- If you select **Yes**, you are indicating that the vehicle meets all requirements for that FMVSS.
- If you select **No** or **Unknown**, describe the potential noncompliance and explain how any risks resulting from the potential noncompliance will be mitigated. If the mitigation includes compliance with standards other than the FMVSS, identify each such standard and explain how the vehicle’s conformity to the other standard compares to compliance with the corresponding FMVSS provision.
- If you select **Not Applicable**, explain why you believe that FMVSS does not apply.

FMVSS	Meets the Requirements? *	Description/Explanation	Mitigation

305	Electric-powered vehicles; electrolyte spillage and shock	●	●	●	●	●				
401	Interior trunk release	19								
403	Platform lift systems for motor vehicles 20									●
404	Platform lift installations in motor vehicles 20	●	●	●	●	●	●	●		
500	Low-speed vehicles 21								●	22

Endnotes:

1	GVWR > 3,500 kg (7,716 pounds)
2	See FMVSS 110, S4.1
3	Applicable to a bus with an automatic transmission and a "park" position (brake transmission shift interlock) See FMVSS 114, S5.3
4	See FMVSS 120, S5.1.1
4a	New pneumatic light truck tires with a tread depth of 18/32 inch or greater, for use on motor vehicles with a GVWR of 4,536 kilograms (10,000 pounds) or less and bias ply light truck tires
5	Except certain vehicles -- See FMVSS 121 for list
6	Except multifunction school activity buses
7	GVWR < 3,500 kg (7,716 pounds)
8	Applicable to specific buses and truck tractors with a GVWR > 11,793 kg (26,000 pounds)
9	Except vehicles with dual rear wheels
10	Upper head impacts (S6) limited to buses with GVWR ≤ 3,860 kg (8,509 pounds)
11	Driver's seat only
12	Unloaded vehicle weight < 2,495 kg (4,000 pounds)
13	For crash test, Bus, MPV, Truck GVWR < 2,722 kg (6,000 pounds); adv dummies & pole test phase-in begins 9/1/2010
14	GVWR < 2,722 kg (6,000 pounds); See FMVSS No. 216 for phase-out schedule
15	See FMVSS 216a for phase-in schedule
16	Certain trailer types are exempt
17	GVWR < 3,855 kg (8,500 pounds)
18	Except walk-in vans, modified roof vehicles, convertibles, or certain law enforcement vehicles, correctional institution vehicles, taxis and limousines. Phase-in began 9/1/2013
19	Passenger cars with a trunk, not a back door
20	Platform lifts designed to carry passengers into and out of a vehicle
21	GVWR < 1,361 kg (3,000 pounds); Max. Speed 40km/h (25mph); Min. Speed 32.2km/h (20 mph)
22	See list in S5(b) of FMVSS 500

Document Revisions

Revision Date	Description
02/13/2017	Updated <i>FMVSS Applicability to Vehicle Type and Equipment Items</i> table in Appendix 8 for FMVSS No. 206.
07/12/2019	Added new label supplier's information to Appendix 5
01/21/2020	Updated <i>FMVSS Applicability to Vehicle Type and Equipment Items</i> table in Appendix 8
06/17/2020	Added 3 new label suppliers' information to Appendix 5
08/21/2020	Updated screenshots on Appendix 7
02/01/2021	Updated <i>FMVSS Applicability to Vehicle Type and Equipment Items</i> table in Appendix 8 for FMVSS No. 206.
03/03/2021	Updated screenshots on Appendix 6: Sample Search Screen, Search Results, and WMI search results pages.
08/05/2021	Updated correspondence information for Part 551 - Designate a Permanent Resident of the United States as its Agent for Service of Process.
04/26/2022	Added Appendix 8 - How to Enter 586 Submittals Using NHTSA's Manufacturer Portal.
06/13/2022	Added Appendix 9 - How to Enter 586 Submittals Using NHTSA's Manufacturer Portal and Appendix 10- How to Enter Replica Vehicles - Annual Report (49 CFR Part 586.12)
06/13/2022	Added Appendix 11 How to use Manufacturer ID feature for submitting 586 application (Domestic manufacturers only) Added Appendix 11 - How to Enter Replica Vehicles - Annual Report (49 CFR Part 586.12) Added Appendix 12 – How to Enter BOX 7 submittals Using NHTSA's Manufacturer Portal Temporary Import Exemption Application for VEHICLES (Box 7 on the HS-7 Form) Temporary Import Exemption Application for EQUIPMENT (Box 7 on the HS-7)
9/15/2022	Added Appendix 8 - How to enter Part 565 Submittal using NHTSA's Manufacturer Portal
